

## 1- Oleoresins

Oleoresins are pure extracts of a spice or herb. They are concentrated natural liquid flavorings that contain both volatile and non-volatile flavor components. Oleoresins provide flavor profiles characteristic of the ground spice or herb with a more rapid flavor release. Our Oleoresins are produced with the finest spices from around the world; they preserve the robust flavor and aroma of the spice.

### Focus Application Segments

- 1- Snack flavors
- 2- Meat seasonings
- 3- Meat processing
- 4- Sucres&Dressing
- 5- Pickling
- 6- Breading

| 7  | Pastrami Spice Blend         |
| 8  | Pizza Spice Blend            |
| 9  | Ketchup Spice Blend          |

## Natural Anti-Oxidants

Our senses respond to the look, feel and flavor of our food. We instinctively know what is good for us and what could be harmful. Discoloration and rancidity of food are the first signs of oxidation, which is the degeneration of food due to the exposure of food chemicals to oxygen. The damage that starts with the look and feel of the food will ultimately result in loss of nutrition. Oxidation of food can be combated by antioxidants. They arrest degradation and help preserve the original flavor, texture and wholesome goodness of our food. Our affinity to nature has led us to develop natural antioxidants that help extend the shelf life of food. Choose from our range of natural antioxidants that preserve the aroma, flavor and quality of your food.

## Application

Our range of natural anti-oxidants is used as a preservative and quality enhancer in ready to serve foods, and beverages.

## Our Range

| No | Item Name                 |
|----|---------------------------|

| 4  | Oleoresin Spinach         |
| 5  | Oleoresin Oreganum        |
| 6  | Natural Mixed Tocopherols |

## Spice Hydrops

The cell walls of various plant parts are store houses of various bio ingredients. Tightly packed inside these cell walls, we carefully extract these ingredients to help develop various food products. Most of the times, natural ingredients are fat soluble. And according to the customer requirement, we also provide water soluble and water dispersible products. Spice Hydrops™ fall into our range of products developed and processed for perfection.

## Application

- 1- Processed Food
- 2- Sauces & Dressings
- 3- Seasoning & Flavoring
