

Phos KC12

Product Specification

Product Description

Emulsifying salt based on phosphate for the production of processed cheese.

Applications

Phos KC12 is used as an alkaline pH correcting salt in combination with the other phosphates emulsifying salts to raise the pH to the needed pH in the final product depending on the raw material pH.

Recommended Dosage

The recommended dose from 0.1 - 1% calculated on processed raw material.

Composition

Sodium orthophosphate **E339**

Properties

pH-shift:	+0.1/+1.5
Ion exchange capacity:	None
Creaming action:	None
Buffering capacity:	Very strong

Chemical & Physical Specifications

Appearance:	White powder
Odor:	Neutral
Moisture:	Max 3%
pH (1% solution):	11.5 : 12.5
P ₂ O ₅ :	41.2% ± 1

Heavy Metal Specifications

Arsenic:	Max. 1 ppm
Lead:	Max. 1 ppm
Mercury:	Max. 1 ppm
Cadmium:	Max. 1 ppm

Shelf-life

Shelf life is 2 years from date of production.

Storage

Should be stored under cool and dry conditions.
(protect from humidity)

Packaging

Paper sacks with polyethylene liner 25 Kg.

GMO Declaration

Labelling not required according to EEC regulation **1829/2003** and **1830/2003**.

Certificates

ISO 9001, ISO 14001, ISO 45001, FSSC: V6
