TECHNICAL SHEET *Think natural.®* Nataseen®-L

Think natural.® Nataseen®-L

Natural antimicrobial - Material no. SBR102

Description

Natamycin, the active ingredient in Nataseen®-L, also known as pimaricin, is a fungicide of the polyene macrolide group produced by natural strains of *Streptomyces natalensis* or of *Streptococcus lactis*, it is especially effective against yeasts and moulds.

Functional uses

Natural antimicrobial preservative, against yeasts and moulds. It is effective in a variety of applications, including surface treatment of cheese, coatings and suspensions and spraying onto shredded cheese; surface treatment of processed meat and fish products; direct addition to yoghurt, sour cream, cream cheese and cottage cheese; direct addition to fruit juices and fruit pulp; canned foods; quick frozen lobster, fish pastes, fish roe and spawn.

Key benefits

- Natural and non-animal source
- Effectively inhibit or kill yeasts and moulds
- Extends shelf life
- Effective over a wide range of pH values (3-9)
- Has no effect on bacteria, making it useful for food products produced by bacterial cultures
- Secures desired food flavour
- Improves cost efficiency due to the low dosage rate
- Meets consumer demands for food protected with natural antimicrobials by fully or partially replacing synthetic additives

Usage levels

The recommended dosage of Nataseen®-L is in the range 5-50 mg per kg. The actual dosage depends on the nature of the product for which it is intended.

Directions for use

Nataseen®-L is effective in a variety of applications. The method depends on the different applications. Please contact us for specific information.
