

PRODUCT SPECIFICATION

PRODUCT

Valiren® 2400 GRANULAR

CHARACTERISTICS

Description	Valiren® 2400 Granular is a food grade enzyme system, produced by the controlled fermentation of non-genetically modified <i>Rhizomucor miehei</i> (formerly <i>Mucor miehei</i>). It contains the specific protease activity that makes it effective as a milk clotting enzyme.
Enzymatic Composition	Microbial Rennet derived from <i>Rhizomucor miehei</i> (milk clotting protease enzyme), sodium chloride, sodium benzoate
Activity	≥ 2400 IMCU/g
Appearance	Brownish granular
Application	Enzyme use levels are generally dictated by processing conditions, milk composition, and CaCl ₂ concentration. In general, 7-11 gram of Valiren® 2400 Granular is used per 1000 litres of milk, but laboratory or pilot scale tests should be run to optimize dose levels.
Storage Conditions	Valiren® 2400 Granular should be stored in sealed containers under cool, dry conditions to minimize the loss of activity. Shelf life can be extended by storing under refrigeration at 5°C.
Shelf Life	3 years under storage conditions.
Packaging	Food Grade HDPE, it is available in various different packaging starting from 0.5 kg to 50 kg

Chemical Properties	Specification
Activity	≥ 2400 IMCU/g
Heavy metals	< = 30 ppm
Lead	< = 5 ppm
Arsenic	< = 3 ppm
Mercury	< = 0.5 ppm
Cadmium	< = 0.5 ppm
Microbiological Properties	Specification
Total Count	< = 1000 cfu/g
Anaerobic sulphite reducing bacteria	< = 30 cfu/g
Yeast	< = 10 cfu/g
Molds	< = 10 cfu/g
Coliforms	< = 10 cfu/g
<i>Staphylococcus aureus</i> (in 1 g)	Negative
<i>Listeria</i> (in 25 g)	Negative
<i>E. coli</i> (in 25 g)	Negative

GMO Status

GMO free according Regulation 95/2/EC and Regulation 1830/2003

Allergen status
Directive EC/2007/68 and
EC/2000/13

Does not contain any allergen material.

Certificates

FSSC 22000, Halal, Kosher

Compliance

This product complies with JECFA (FAO/WHO) and FCC recommended specifications for food grade enzymes

Certificate of analysis and other technical data are available upon request.
