1-to-1 Application Mappings

1. Master Industry Sectors & TDS Coverage Overview

Level 1: Industry Sector	Categories / Subs	Products	Routes	Direct TDS	Copied TDS	Pending CoA	TDS %
Meat & Poultry	5 Cats / 9 Subs	220	242	116	102	24	90%
Dairy	6 Cats / 15 Subs	148	157	112	1	44	72%
Snacks & Savory Seasonings	1 Cats / 1 Subs	145	145	54	80	11	92%
Sauces, Condiments & Dressings	4 Cats / 4 Subs	109	109	16	76	17	84%
Bakery	5 Cats / 11 Subs	99	100	55	5	40	60%
Beverages	6 Cats / 6 Subs	48	48	7	1	40	17%
Confectionery	3 Cats / 3 Subs	22	22	0	0	22	0%

2. Executive Framework & Standardization Principles

- **100% Industry Distribution:** Eliminated generic umbrella categories (such as "Processing" and standalone "Plant-Based"). All functional aids, plant proteins, and antifoams are allocated directly to the industrial food matrices where they perform.
- **Relational Bridge Architecture:** Resolved multi-value semicolon strings into **823 normalized relational rows** in Application_Bridge_Map, ensuring clean integration with Power BI dashboards and ERP master data.
- **Streamlined Laboratory R&D Queue:** Consolidated 100 missing items into **52 unique Base Ingredient Families (zero repeats)** for efficient procurement and Certificate of Analysis (CoA) collection.
- **Variant & Concentration Hierarchy:** Distinguished identical functional extracts (e.g. 33 Black Pepper grades, 30 Paprika grades) into parent Product Families while maintaining individual active concentration tracking.

CHAPTER 1

MEAT & POULTRY SECTOR

220 Master Products

242 Application Routes

Itemized finished-product matrix distribution, functional ingredient behavior, and physical TDS laboratory audit status:

📁 Level 2 Product Category: Sausage Casings (1 Application Matrices)

🔗 Level 3 Application: Shirred Cellulose Casings (6 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#2	Cellulose casing - 23E*84 Family: Cellulose Casings	High mechanical tensile strength for automated stuffing of hot dogs, frankfurters, and smoked sausages, uniform caliber diameter, optimal smoke permeability, and clean peeling.	Direct TDS	Validated
#214	Cellulose casing - 26E*84 Family: Cellulose Casings	High mechanical tensile strength for automated stuffing of hot dogs, frankfurters, and smoked sausages, uniform caliber diameter, optimal smoke permeability, and clean peeling.	Copied Sibling	Proposed
#215	Cellulose casing - 21E*84 Family: Cellulose Casings	High mechanical tensile strength for automated stuffing of hot dogs, frankfurters, and smoked sausages, uniform caliber diameter, optimal smoke permeability, and clean peeling.	Copied Sibling	Proposed
#216	Cellulose casing - 28E*84 Family: Cellulose Casings	High mechanical tensile strength for automated stuffing of hot dogs, frankfurters, and smoked sausages, uniform caliber diameter, optimal smoke permeability, and clean peeling.	Copied Sibling	Proposed
#237	Frankfurte casing 24/84 Family: Cellulose Casings	High mechanical tensile strength for automated stuffing of hot dogs, frankfurters, and smoked sausages, uniform caliber diameter, optimal smoke permeability, and clean peeling.	Copied Sibling	Proposed
#346	Smoked casing - 23E*84 Family: Cellulose Casings	High mechanical tensile strength for automated stuffing of hot dogs, frankfurters, and smoked sausages, uniform caliber diameter, optimal smoke permeability, and clean peeling.	Copied Sibling	Proposed

📁 Level 2 Product Category: Processed Meat (4 Application Matrices)

🔗 Level 3 Application: Emulsified Sausages (141 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#3	NRE 1000 Family: NRE 1000	Heat- and light-stable vivid cured pink-to-red hue in frankfurters and sausages.	Direct TDS	Validated
#4	NRE 1500 Family: NRE 1500	Heat- and light-stable vivid cured pink-to-red hue in frankfurters and sausages.	Direct TDS	Validated
#11	Paprika Oleoresin 20,000 CU Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Direct TDS	Validated
#12	Technical Data Sheet of Natural red color Family: Technical Data Sheet of Natural red color	Heat- and light-stable vivid cured pink-to-red hue in frankfurters and sausages.	Direct TDS	Validated
#110	Textra P 105 Family: Textra / Revastab Meat & Gelling Blends	Optimizes myofibrillar protein activation, binds fat and water tightly, and enhances casing bite in frankfurters.	Direct TDS	Validated
#112	Textra P 108 AH Family: Textra / Revastab Meat & Gelling Blends	Optimizes myofibrillar protein activation, binds fat and water tightly, and enhances casing bite in frankfurters.	Direct TDS	Validated
#113	Textra P 125 Family: Textra / Revastab Meat & Gelling Blends	Optimizes myofibrillar protein activation, binds fat and water tightly, and enhances casing bite in frankfurters.	Direct TDS	Validated
#114	Textra P 204 Family: Textra / Revastab Meat & Gelling Blends	Optimizes myofibrillar protein activation, binds fat and water tightly, and enhances casing bite in frankfurters.	Direct TDS	Validated
#116	Textra P105K Family: Textra / Revastab Meat & Gelling Blends	Optimizes myofibrillar protein activation, binds fat and water tightly, and enhances casing bite in frankfurters.	Direct TDS	Validated
#119	Textra P53 Family: Textra / Revastab Meat & Gelling Blends	Optimizes myofibrillar protein activation, binds fat and water tightly, and enhances casing bite in frankfurters.	Direct TDS	Validated

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#121	Textra TP 100 Family: Textra TP 100	Optimizes myofibrillar protein activation, binds fat and water tightly, and enhances casing bite in frankfurters.	Direct TDS	Validated
#127	Paprika Oleoresin 100,000 CU Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Direct TDS	Validated
#128	Rosemary Oleoresin 1001 Family: Rosemary Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#129	Thyme Oleoresin 1001 Family: Thyme Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#130	OLEORESIN TURMERIC Family: OLEORESIN TURMERIC	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#131	Pepper White Oleoresin 1001 Family: Pepper White Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#132	Pepper Black Oleoresin 1001 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Direct TDS	Validated
#133	Fennel Oleoresin 1001 Family: Fennel Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#134	Oleoresin Basil Family: Oleoresin Basil	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#135	Capsicum Oleoresin 1001 Family: Capsicum Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#136	Cardamom Oleoresin 1001 Family: Cardamom Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#137	OLEORESIN CELERY Family: OLEORESIN CELERY	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#138	Cassia Oleoresin 1001 Family: Cassia / Cinnamon Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#139	Clove Bud Oleoresin 1001 Family: Clove Bud Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#140	Coriander Oleoresin 1001 Family: Coriander Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#141	Cumin Oleoresin 1001 Family: Cumin Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#142	Fenugreek Oleoresin 1001 Family: Fenugreek Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#143	Ginger Oleoresin 1001 Family: Ginger Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#144	Mace Oleoresin Family: Mace Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#145	Nutmeg Oleoresin 1001 Family: Nutmeg Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#146	Oregano Oleoresin 1001 Family: Oregano Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#147	Celery Seed Oil Family: Celery Seed Oil	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#148	CINNAMON LEAF OIL Family: CINNAMON LEAF OIL	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#149	CLOVE LEAF OIL Family: CLOVE LEAF OIL	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#150	Coriander Oleoresin 1001 Family: Coriander Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#151	Cumin Oleoresin 1001 Family: Cumin Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#152	Dill Oleoresin 1001 Family: Dill Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#155	Ginger Oleoresin 1001 Family: Ginger Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#156	Mace OIL Family: Mace OIL	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#157	Mustard Oleoresin 1001 Family: Mustard Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#158	Nutmeg Oleoresin 1001 Family: Nutmeg Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#160	Oregano Oleoresin 1001 Family: Oregano Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#161	Rosemary Oleoresin 1001 Family: Rosemary Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#162	Thyme Oleoresin 1001 Family: Thyme Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#163	Aniseed Oil Family: Aniseed Oil	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#164	Pepper Black Oleoresin 1001 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Direct TDS	Validated
#165	Cardamom Oleoresin 1001 Family: Cardamom Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#166	Cassia Oleoresin 1001 Family: Cassia / Cinnamon Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#168	Thyme Oleoresin 1001 Family: Thyme Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#169	Oleoresin Basil Family: Oleoresin Basil	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#170	Oregano Oleoresin 1001 Family: Oregano Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#171	Rosemary Oleoresin 1001 Family: Rosemary Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#172	Oleoresin spinach Family: Oleoresin spinach	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#173	Burger Spice Blend Family: Burger Spice Blend	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#174	HOT DOG SPICE BLEND Family: HOT DOG SPICE BLEND	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#175	Ketch up oil 1001 - SM Family: Ketch up oil 1001 - SM	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#176	Kofta Spice Blend Family: Kofta Spice Blend	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#177	Luncheon Spice Blend Family: Luncheon Spice Blend	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#178	Oriental Sausage Spice Blend Family: Oriental Sausage Spice Blend	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#179	Pastrami Spice Blend Family: Pastrami Spice Blend	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#180	Pizza Spice Blend Family: Pizza Spice Blend	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated
#181	Roasted Beef Spice Blend Family: Roasted Beef Spice Blend	Even seasoning dispersion in cutter or tumbler without microbial load.	Direct TDS	Validated

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#193	Beet root extract Family: Beet Root Color	Heat- and light-stable vivid cured pink-to-red hue in frankfurters and sausages.	Pending CoA	Proposed
#194	Blackcurrant Anthocyanin Family: Anthocyanin Natural Color	Heat- and light-stable vivid cured pink-to-red hue in frankfurters and sausages.	Pending CoA	Proposed
#195	Blackcurrant Anthocyanin 20 KG Family: Anthocyanin Natural Color	Heat- and light-stable vivid cured pink-to-red hue in frankfurters and sausages.	Pending CoA	Proposed
#199	Capsicum Oleoresin 1000 Family: Capsicum Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Copied Sibling	Proposed
#200	Capsicum Oleoresin 1002 Family: Capsicum Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Copied Sibling	Proposed
#201	Capsicum Oleoresin 1003 Family: Capsicum Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Copied Sibling	Proposed
#202	Capsicum Oleoresin 500,000 SHU Family: Capsicum Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Copied Sibling	Proposed
#211	Cardamom Oleoresin 1002 Family: Cardamom Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Copied Sibling	Proposed
#212	Carmine WS 50 % Family: Carmine Natural Color	Heat- and light-stable vivid cured pink-to-red hue in frankfurters and sausages.	Pending CoA	Proposed
#249	Laurel Oleoresin 1001 Family: Laurel Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Pending CoA	Proposed
#257	Marjoram Oleoresin 1001 Family: Marjoram Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Pending CoA	Proposed
#269	Paprika Oleoresin 1000 Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#270	Paprika Oleoresin 1001 Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#271	Paprika Oleoresin 1002 Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#272	Paprika Oleoresin 1003 Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#273	Paprika Oleoresin 1004 Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#274	Paprika Oleoresin 1005 Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#275	Paprika Oleoresin 1006 Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#276	Paprika Oleoresin 1007 Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#277	Paprika Oleoresin 1008 Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#278	Paprika Oleoresin 1009 Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#279	Paprika Oleoresin 1010 Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#280	Paprika Oleoresin 1011 Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#281	Paprika Oleoresin 1012 Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#282	Paprika Oleoresin 1013 Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#283	Paprika Oleoresin 1014 Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#284	Paprika Oleoresin 1015 Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#285	Paprika Oleoresin 1016 Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#286	Paprika Oleoresin 1017 Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#287	Paprika Oleoresin 1018 Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#288	Paprika Oleoresin 1019 Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#289	Paprika Oleoresin 1020 Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#290	Paprika Oleoresin 1021 Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#291	Paprika Oleoresin 1022 Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#292	Paprika Oleoresin 1023 Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#293	Paprika Oleoresin 40,000 CU Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#294	Paprika Oleoresin 40,000 CU OS Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#295	Paprika Oleoresin 40,000 CU WS Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#296	Paprika Oleoresin 60,000 CU Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#297	Paprika Oleoresin 80,000 CU Family: Paprika Oleoresin	Natural red-orange color standardization and mild warm spice notes in sausages.	Copied Sibling	Proposed
#298	Parsley Oleoresin 1001 Family: Parsley Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Pending CoA	Proposed
#299	Parsley Oleoresin 1002 Family: Parsley Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Pending CoA	Proposed
#300	Parsley Oleoresin 1003 Family: Parsley Oleoresin	Even seasoning dispersion in cutter or tumbler without microbial load.	Pending CoA	Proposed
#311	Pepper Black Oleoresin 1002 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#312	Pepper Black Oleoresin 1003 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#313	Pepper Black Oleoresin 1004 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#314	Pepper Black Oleoresin 1005 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#315	Pepper Black Oleoresin 1006 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#316	Pepper Black Oleoresin 1007 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#317	Pepper Black Oleoresin 1008 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#318	Pepper Black Oleoresin 1009 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#319	Pepper Black Oleoresin 1010 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#320	Pepper Black Oleoresin 1011 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#321	Pepper Black Oleoresin 1012 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#322	Pepper Black Oleoresin 1013 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#323	Pepper Black Oleoresin 1014 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#324	Pepper Black Oleoresin 1015 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#325	Pepper Black Oleoresin 1016 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#326	Pepper Black Oleoresin 1017 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#327	Pepper Black Oleoresin 1018 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#328	Pepper Black Oleoresin 1019 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#329	Pepper Black Oleoresin 1020 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#330	Pepper Black Oleoresin 1021 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#331	Pepper Black Oleoresin 1022 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#332	Pepper Black Oleoresin 1023 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#333	Pepper Black Oleoresin 1024 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#334	Pepper Black Oleoresin 1025 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#335	Pepper Black Oleoresin 1026 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#336	Pepper Black Oleoresin 1027 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#337	Pepper Black Oleoresin 1028 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#338	Pepper Black Oleoresin 1029 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#339	Pepper Black Oleoresin 1030 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#340	Pepper Black Oleoresin 1031 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#341	Pepper Black Oleoresin 1032 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#342	Pepper Black Oleoresin 40/20 Family: Pepper Black Oleoresin	Standardized black pepper heat and terpene aroma without microbial contamination.	Copied Sibling	Proposed
#363	Textra P 103 25 kg Family: Textra / Revastab Meat & Gelling Blends	Optimizes myofibrillar protein activation, binds fat and water tightly, and enhances casing bite in frankfurters.	Copied Sibling	Proposed

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#364	TEXTRA P 104 25 kg Family: Textra / Revastab Meat & Gelling Blends	Optimizes myofibrillar protein activation, binds fat and water tightly, and enhances casing bite in frankfurters.	Copied Sibling	Proposed
#365	Textra P100 Family: Textra / Revastab Meat & Gelling Blends	Optimizes myofibrillar protein activation, binds fat and water tightly, and enhances casing bite in frankfurters.	Copied Sibling	Proposed
#366	Textra P100 25 kg Family: Textra / Revastab Meat & Gelling Blends	Optimizes myofibrillar protein activation, binds fat and water tightly, and enhances casing bite in frankfurters.	Copied Sibling	Proposed

 Level 3 Application: Emulsified Sausages & Restructured Meat (11 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#10	Sodium Nitrite-Germany-25kg Family: Sodium Nitrite Food Grade	Optimizes meat protein binding, cured color fixation, texture cross-linking, and shelf-life extension in sausages, luncheon, and beef pastrami.	Direct TDS	Validated
#27	Meat Tenderizer Family: Meat Tenderizer	Optimizes meat protein binding, cured color fixation, texture cross-linking, and shelf-life extension in sausages, luncheon, and beef pastrami.	Direct TDS	Validated
#251	Liquid Smoke Family: Liquid Smoke	Optimizes meat protein binding, cured color fixation, texture cross-linking, and shelf-life extension in sausages, luncheon, and beef pastrami.	Pending CoA	Proposed
#258	MEAT FLAVOR S0843603 Family: MEAT FLAVOR S0843603	Optimizes meat protein binding, cured color fixation, texture cross-linking, and shelf-life extension in sausages, luncheon, and beef pastrami.	Pending CoA	Proposed
#301	PDI Salt-Local-50kg Family: PDI Salt-Local-50kg	Optimizes meat protein binding, cured color fixation, texture cross-linking, and shelf-life extension in sausages, luncheon, and beef pastrami.	Pending CoA	Proposed
#348	Sodium Ascorbate China Family: Sodium Ascorbate China	Optimizes meat protein binding, cured color fixation, texture cross-linking, and shelf-life extension in sausages, luncheon, and beef pastrami.	Pending CoA	Proposed
#352	Sodium Diacetate-25kg Family: Sodium Diacetate-25kg	Optimizes meat protein binding, cured color fixation, texture cross-linking, and shelf-life extension in sausages, luncheon, and beef pastrami.	Pending CoA	Proposed
#353	Sodium Erythorbate China-25kg Family: Sodium Erythorbate China-25kg	Optimizes meat protein binding, cured color fixation, texture cross-linking, and shelf-life extension in sausages, luncheon, and beef pastrami.	Pending CoA	Proposed
#355	Sodium Lactate-25kg Family: Sodium Lactate-25kg	Optimizes meat protein binding, cured color fixation, texture cross-linking, and shelf-life extension in sausages, luncheon, and beef pastrami.	Pending CoA	Proposed
#356	Sodium Metabisulfite-25kg Family: Sodium Metabisulfite-25kg	Optimizes meat protein binding, cured color fixation, texture cross-linking, and shelf-life extension in sausages, luncheon, and beef pastrami.	Pending CoA	Proposed
#367	Transglutaminase (TG) Family: Transglutaminase (TG)	Optimizes meat protein binding, cured color fixation, texture cross-linking, and shelf-life extension in sausages, luncheon, and beef pastrami.	Pending CoA	Proposed

 Level 3 Application: Cooked Sausages & Fermented Salami (2 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#83	Siveele Technical Sheet Nataseen-L Family: Siveele Technical Sheet Nataseen-L	Natural bio-preservation inhibiting spoilage and pathogenic bacteria.	Direct TDS	Validated
#84	Siveele Technical Sheet NiseenR-S Family: Siveele Technical Sheet NiseenR-S	Natural bio-preservation inhibiting spoilage and pathogenic bacteria.	Direct TDS	Validated

 Level 3 Application: Emulsified Sausages & Injected Poultry (1 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#213	CARRAGEENAN CK-500 Family: Carrageenan CK/M Series	Forms thermo-irreversible protein gel network, increasing cooking yield and slice elasticity.	Pending CoA	Proposed

 Level 2 Product Category: Minced Meat & Meat Alternatives (2 Application Matrices)

 Level 3 Application: Burgers, Kofta & Plant-Based Nuggets (11 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#8	TVP Soya Local Family: Soya Proteins & TVP	Provides meat-like fibrous chewiness, binds fat and water, reduces formulation cost, and builds structure in meat patties and plant-based nuggets.	Direct TDS	Validated
#93	TVP TDS-A+ Family: TVP TDS-A+	Provides meat-like fibrous chewiness, binds fat and water, reduces formulation cost, and builds structure in meat patties and plant-based nuggets.	Direct TDS	Validated
#94	TVP Family: TVP	Provides meat-like fibrous chewiness, binds fat and water, reduces formulation cost, and builds structure in meat patties and plant-based nuggets.	Direct TDS	Validated
#236	Fish Collagen Family: Fish Collagen	Provides meat-like fibrous chewiness, binds fat and water, reduces formulation cost, and builds structure in meat patties and plant-based nuggets.	Pending CoA	Proposed
#259	Meat Protein Family: Meat Protein	Provides meat-like fibrous chewiness, binds fat and water, reduces formulation cost, and builds structure in meat patties and plant-based nuggets.	Pending CoA	Proposed
#358	Soya Protein Concentrate 70% Family: Soya Proteins & TVP	Provides meat-like fibrous chewiness, binds fat and water, reduces formulation cost, and builds structure in meat patties and plant-based nuggets.	Copied Sibling	Proposed
#359	Soya Protein Isolate 90% Family: Soya Proteins & TVP	Provides meat-like fibrous chewiness, binds fat and water, reduces formulation cost, and builds structure in meat patties and plant-based nuggets.	Copied Sibling	Proposed
#360	Soya Protein Isolate 90% (Gelling) Family: Soya Proteins & TVP	Provides meat-like fibrous chewiness, binds fat and water, reduces formulation cost, and builds structure in meat patties and plant-based nuggets.	Copied Sibling	Proposed
#361	Soya Protein Isolate 90% (Injection) Family: Soya Proteins & TVP	Provides meat-like fibrous chewiness, binds fat and water, reduces formulation cost, and builds structure in meat patties and plant-based nuggets.	Copied Sibling	Proposed
#368	TVP Soya Local - S Family: Soya Proteins & TVP	Provides meat-like fibrous chewiness, binds fat and water, reduces formulation cost, and builds structure in meat patties and plant-based nuggets.	Copied Sibling	Proposed
#370	Whey Protein Concentrate 80% (WPC 80) Family: Whey Protein Concentrate 80% (WPC 80)	Provides meat-like fibrous chewiness, binds fat and water, reduces formulation cost, and builds structure in meat patties and plant-based nuggets.	Pending CoA	Proposed

 Level 3 Application: Burgers, Kofta & Meatballs (27 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#110	Textra P 105 Family: Textra / Revastab Meat & Gelling Blends	Reduces cooking shrinkage, maintains juiciness, and prevents fat-out in burger patties.	Direct TDS	Validated
#112	Textra P 108 AH Family: Textra / Revastab Meat & Gelling Blends	Reduces cooking shrinkage, maintains juiciness, and prevents fat-out in burger patties.	Direct TDS	Validated
#113	Textra P 125 Family: Textra / Revastab Meat & Gelling Blends	Reduces cooking shrinkage, maintains juiciness, and prevents fat-out in burger patties.	Direct TDS	Validated
#114	Textra P 204 Family: Textra / Revastab Meat & Gelling Blends	Reduces cooking shrinkage, maintains juiciness, and prevents fat-out in burger patties.	Direct TDS	Validated
#116	Textra P105K Family: Textra / Revastab Meat & Gelling Blends	Reduces cooking shrinkage, maintains juiciness, and prevents fat-out in burger patties.	Direct TDS	Validated

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#119	Textra P53 Family: Textra / Revastab Meat & Gelling Blends	Reduces cooking shrinkage, maintains juiciness, and prevents fat-out in burger patties.	Direct TDS	Validated
#121	Textra TP 100 Family: Textra TP 100	Reduces cooking shrinkage, maintains juiciness, and prevents fat-out in burger patties.	Direct TDS	Validated
#154	Garlic Oleoresin 1001 Family: Garlic Oleoresin	Clean allium flavor integration without scorching on open grills.	Direct TDS	Validated
#159	Onion Oleoresin 1001 Family: Onion Oleoresin	Clean allium flavor integration without scorching on open grills.	Direct TDS	Validated
#238	Garlic Oleoresin 1002 Family: Garlic Oleoresin	Clean allium flavor integration without scorching on open grills.	Copied Sibling	Proposed
#239	Garlic Oleoresin 1003 Family: Garlic Oleoresin	Clean allium flavor integration without scorching on open grills.	Copied Sibling	Proposed
#240	Garlic Oleoresin 1004 Family: Garlic Oleoresin	Clean allium flavor integration without scorching on open grills.	Copied Sibling	Proposed
#241	Garlic Oleoresin 1005 Family: Garlic Oleoresin	Clean allium flavor integration without scorching on open grills.	Copied Sibling	Proposed
#242	Garlic Oleoresin 50/50 Family: Garlic Oleoresin	Clean allium flavor integration without scorching on open grills.	Copied Sibling	Proposed
#243	Garlic Oleoresin 60/40 Family: Garlic Oleoresin	Clean allium flavor integration without scorching on open grills.	Copied Sibling	Proposed
#261	Onion Oleoresin 1002 Family: Onion Oleoresin	Clean allium flavor integration without scorching on open grills.	Copied Sibling	Proposed
#262	Onion Oleoresin 1003 Family: Onion Oleoresin	Clean allium flavor integration without scorching on open grills.	Copied Sibling	Proposed
#263	Onion Oleoresin 1004 Family: Onion Oleoresin	Clean allium flavor integration without scorching on open grills.	Copied Sibling	Proposed
#264	Onion Oleoresin 50/50 Family: Onion Oleoresin	Clean allium flavor integration without scorching on open grills.	Copied Sibling	Proposed
#265	Onion Oleoresin 60/40 Family: Onion Oleoresin	Clean allium flavor integration without scorching on open grills.	Copied Sibling	Proposed
#266	Onion Oleoresin 70/30 Family: Onion Oleoresin	Clean allium flavor integration without scorching on open grills.	Copied Sibling	Proposed
#267	Onion Oleoresin 80/20 Family: Onion Oleoresin	Clean allium flavor integration without scorching on open grills.	Copied Sibling	Proposed
#268	Onion Oleoresin 90/10 Family: Onion Oleoresin	Clean allium flavor integration without scorching on open grills.	Copied Sibling	Proposed
#363	Textra P 103 25 kg Family: Textra / Revastab Meat & Gelling Blends	Reduces cooking shrinkage, maintains juiciness, and prevents fat-out in burger patties.	Copied Sibling	Proposed
#364	TEXTRA P 104 25 kg Family: Textra / Revastab Meat & Gelling Blends	Reduces cooking shrinkage, maintains juiciness, and prevents fat-out in burger patties.	Copied Sibling	Proposed
#365	Textra P100 Family: Textra / Revastab Meat & Gelling Blends	Reduces cooking shrinkage, maintains juiciness, and prevents fat-out in burger patties.	Copied Sibling	Proposed
#366	Textra P100 25 kg Family: Textra / Revastab Meat & Gelling Blends	Reduces cooking shrinkage, maintains juiciness, and prevents fat-out in burger patties.	Copied Sibling	Proposed

 Level 2 Product Category: Poultry Processing & Sausages (1 Application Matrices)

 Level 3 Application: Injected Chicken / Turkey Breasts & Sausages (32 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#40	Phos 10 Family: Phos 10	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#41	Phos 11 Family: Phos 11	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#42	Phos 8 Family: Phos 8	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#43	Phos AC04 Family: Phos AC04	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#44	Phos B200 Family: Phos B200	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#45	Phos B250 Family: Phos B250	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#46	Phos B300 Family: Phos B300	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#47	Phos B350 Family: Phos B350	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#48	Phos CR116 Family: Phos CR116	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#49	Phos CR120 Family: Phos CR120	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#50	Phos KC12 Family: Phos KC12	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#51	Phos MSL400 Family: Phos MSL400	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#52	Phos MSL440 Family: Phos MSL440	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#53	Phos MSL500 Family: Phos MSL500	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#54	Phos MU100 Family: Phos MU100	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#55	Phos MU200 Family: Phos MU200	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#56	Phos MU300 Family: Phos MU300	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#57	Phos SP101 Family: Phos SP101	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#58	Phos SP102 Family: Phos SP102	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#59	Phos SP120 Family: Phos SP120	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#60	Phos SP122 Family: Phos SP122	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#61	Phos SP125 Family: Phos SP125	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#62	Phos SP130 Family: Phos SP130	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#63	Phos SP135 Family: Phos SP135	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#64	Phos SP140 Family: Phos SP140	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#65	Phos SP145 Family: Phos SP145	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#66	Phos SP152 Family: Phos SP152	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#67	Phos SP154 Family: Phos SP154	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#68	Phos SP227 Family: Phos SP227	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#69	Phos-BS Family: Phos-BS	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Direct TDS	Validated
#354	Sodium Hexametaphosphate (SHMP)-25kg Family: Sodium Hexametaphosphate (SHMP)-25kg	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Pending CoA	Proposed
#357	Sodium Tripolyphosphate (STPP)-25kg Family: STPP Phosphates	Increases muscle protein ionic strength and pH, maximizing brine retention, reducing cooking purge, and enhancing sausage snap.	Pending CoA	Proposed

 Level 2 Product Category: Poultry Processing (1 Application Matrices)

 Level 3 Application: Injected Chicken / Turkey Breasts (11 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#110	Textra P 105 Family: Textra / Revastab Meat & Gelling Blends	Improves yield and texture in injected whole muscle poultry and nuggets.	Direct TDS	Validated
#112	Textra P 108 AH Family: Textra / Revastab Meat & Gelling Blends	Improves yield and texture in injected whole muscle poultry and nuggets.	Direct TDS	Validated
#113	Textra P 125 Family: Textra / Revastab Meat & Gelling Blends	Improves yield and texture in injected whole muscle poultry and nuggets.	Direct TDS	Validated
#114	Textra P 204 Family: Textra / Revastab Meat & Gelling Blends	Improves yield and texture in injected whole muscle poultry and nuggets.	Direct TDS	Validated
#116	Textra P105K Family: Textra / Revastab Meat & Gelling Blends	Improves yield and texture in injected whole muscle poultry and nuggets.	Direct TDS	Validated
#119	Textra P53 Family: Textra / Revastab Meat & Gelling Blends	Improves yield and texture in injected whole muscle poultry and nuggets.	Direct TDS	Validated
#121	Textra TP 100 Family: Textra TP 100	Improves yield and texture in injected whole muscle poultry and nuggets.	Direct TDS	Validated
#363	Textra P 103 25 kg Family: Textra / Revastab Meat & Gelling Blends	Improves yield and texture in injected whole muscle poultry and nuggets.	Copied Sibling	Proposed
#364	TEXTRA P 104 25 kg Family: Textra / Revastab Meat & Gelling Blends	Improves yield and texture in injected whole muscle poultry and nuggets.	Copied Sibling	Proposed
#365	Textra P100 Family: Textra / Revastab Meat & Gelling Blends	Improves yield and texture in injected whole muscle poultry and nuggets.	Copied Sibling	Proposed
#366	Textra P100 25 kg Family: Textra / Revastab Meat & Gelling Blends	Improves yield and texture in injected whole muscle poultry and nuggets.	Copied Sibling	Proposed

CHAPTER 2

DAIRY SECTOR

148 Master Products

157 Application Routes

Itemized finished-product matrix distribution, functional ingredient behavior, and physical TDS laboratory audit status:

📁 Level 2 Product Category: Butter & Margarine (1 Application Matrices)				
🔍 Level 3 Application: Table / Industrial Margarine (5 materials)				
ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#1	GMS (Mono & Diglycerides of Fatty Acids) Family: GMS (Mono & Diglycerides of Fatty Acids)	Stabilizes water-in-oil emulsion and controls crystal morphology in shortenings and table spreads.	Direct TDS	Validated
#13	Tex Mono 160 Family: Tex Emulsifiers (Mono & Diglycerides)	Stabilizes water-in-oil emulsion and controls crystal morphology in shortenings and table spreads.	Direct TDS	Validated
#17	Textra CM 110 Family: Textra Dairy & Ice Cream Stabilizers	Stabilizes water-in-oil emulsion and controls crystal morphology in shortenings and table spreads.	Direct TDS	Validated
#222	Citric Acid Monohydrate Family: Citric Acid	Stabilizes water-in-oil emulsion and controls crystal morphology in shortenings and table spreads.	Pending CoA	Proposed
#235	Dextrose Monohydrate-25kg Family: Dextrose	Stabilizes water-in-oil emulsion and controls crystal morphology in shortenings and table spreads.	Pending CoA	Proposed
📁 Level 2 Product Category: Frozen Dairy (2 Application Matrices)				
🔍 Level 3 Application: Ice Cream & Frozen Desserts (19 materials)				
ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#1	GMS (Mono & Diglycerides of Fatty Acids) Family: GMS (Mono & Diglycerides of Fatty Acids)	Promotes fat agglomeration, improves extrusion stiffness, and retards ice crystal growth.	Direct TDS	Validated
#9	Microcrystalline Cellulose Gel (Type: H811F) Family: Microcrystalline Cellulose Gel (Type: H811F)	Controls ice crystal growth and heat-shock stability.	Direct TDS	Validated
#13	Tex Mono 160 Family: Tex Emulsifiers (Mono & Diglycerides)	Promotes fat agglomeration, improves extrusion stiffness, and retards ice crystal growth.	Direct TDS	Validated
#17	Textra CM 110 Family: Textra Dairy & Ice Cream Stabilizers	Promotes fat agglomeration, improves extrusion stiffness, and retards ice crystal growth.	Direct TDS	Validated
#98	Textra CM ICE 200 ② Family: Textra Dairy & Ice Cream Stabilizers	Provides controlled overrun (air incorporation), creamy texture, and melting resistance.	Direct TDS	Validated
#99	Textra CM Ice 200 ⑤ Family: Textra Dairy & Ice Cream Stabilizers	Provides controlled overrun (air incorporation), creamy texture, and melting resistance.	Direct TDS	Validated
#100	Textra Cream 300 Family: Textra Cream 300	Provides controlled overrun (air incorporation), creamy texture, and melting resistance.	Direct TDS	Validated
#222	Citric Acid Monohydrate Family: Citric Acid	Promotes fat agglomeration, improves extrusion stiffness, and retards ice crystal growth.	Pending CoA	Proposed
#230	Curcumin WS 10 % Family: Curcumin Natural Color	Vibrant yellow color in ice creams and dairy custards.	Pending CoA	Proposed
#231	Curcumin WS 15 % Family: Curcumin Natural Color	Vibrant yellow color in ice creams and dairy custards.	Pending CoA	Proposed
#232	Curcumin WS 5 % Family: Curcumin Natural Color	Vibrant yellow color in ice creams and dairy custards.	Pending CoA	Proposed

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#235	Dextrose Monohydrate-25kg Family: Dextrose	Promotes fat agglomeration, improves extrusion stiffness, and retards ice crystal growth.	Pending CoA	Proposed
#244	Guar gum - 5000 CPS Family: Guar Gum	Delivers rapid cold hydration, binds free water, and eliminates icy crystal growth.	Pending CoA	Proposed
#245	Guar gum - 6000 CPS Family: Guar Gum	Delivers rapid cold hydration, binds free water, and eliminates icy crystal growth.	Pending CoA	Proposed
#252	Locust Bean Gum Family: Locust Bean Gum	Delivers rapid cold hydration, binds free water, and eliminates icy crystal growth.	Pending CoA	Proposed
#254	Lutein WS 10% Family: Lutein Natural Color	Vibrant yellow color in ice creams and dairy custards.	Pending CoA	Proposed
#255	Lutein WS 5% Family: Lutein Natural Color	Vibrant yellow color in ice creams and dairy custards.	Pending CoA	Proposed
#362	Sunset Yellow Family: Sunset Yellow	Vibrant yellow color in ice creams and dairy custards.	Pending CoA	Proposed
#376	Yellow color W Family: Yellow color W	Vibrant yellow color in ice creams and dairy custards.	Pending CoA	Proposed

 Level 3 Application: Vanilla Ice Cream & Custards (1 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#124	Vanillia-01 Family: Vanillia-01	Smooth natural vanilla top-notes.	Direct TDS	Validated

 Level 2 Product Category: Fermented Dairy (3 Application Matrices)

 Level 3 Application: Yogurt (14 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#3	NRE 1000 Family: NRE 1000	Vivid strawberry and cherry coloration in yogurts and dairy desserts.	Direct TDS	Validated
#4	NRE 1500 Family: NRE 1500	Vivid strawberry and cherry coloration in yogurts and dairy desserts.	Direct TDS	Validated
#7	REVATEX -TS4 Family: Textra Modified Starches	Provides spoonable thickness and creaminess without syneresis.	Direct TDS	Validated
#12	Technical Data Sheet of Natural red color Family: Technical Data Sheet of Natural red color	Vivid strawberry and cherry coloration in yogurts and dairy desserts.	Direct TDS	Validated
#18	Corn Starch-Local-25kg Family: Corn Starch-Local-25kg	Provides spoonable thickness and creaminess without syneresis.	Direct TDS	Validated
#82	STARPRO - PDS (HP-CF T0577) Tapioca Family: STARPRO - PDS (HP-CF T0577) Tapioca	Provides spoonable thickness and creaminess without syneresis.	Direct TDS	Validated
#106	Textra MA243 Family: Textra Modified Starches	Provides spoonable thickness and creaminess without syneresis.	Direct TDS	Validated
#107	Textra MS 4060 Family: Textra Modified Starches	Provides spoonable thickness and creaminess without syneresis.	Direct TDS	Validated
#108	Textra MS Pro Family: Textra Modified Starches	Provides spoonable thickness and creaminess without syneresis.	Direct TDS	Validated
#126	Solvarin ACAD-B Family: Solvarin ACAD-B	Provides spoonable thickness and creaminess without syneresis.	Direct TDS	Validated
#193	Beet root extract Family: Beet Root Color	Vivid strawberry and cherry coloration in yogurts and dairy desserts.	Pending CoA	Proposed
#194	Blackcurrant Anthocyanin Family: Anthocyanin Natural Color	Vivid strawberry and cherry coloration in yogurts and dairy desserts.	Pending CoA	Proposed

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#195	Blackcurrent Anthocyanin 20 KG Family: Anthocyanin Natural Color	Vivid strawberry and cherry coloration in yogurts and dairy desserts.	Pending CoA	Proposed
#212	Carmine WS 50 % Family: Carmine Natural Color	Vivid strawberry and cherry coloration in yogurts and dairy desserts.	Pending CoA	Proposed

 Level 3 Application: Diet Yogurts & Flavored Milk (5 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#85	Sweetex 2E Family: Sweetex 2E	Calorie reduction while maintaining full sweet taste perception.	Direct TDS	Validated
#86	Sweetex 2F Family: Sweetex 2F	Calorie reduction while maintaining full sweet taste perception.	Direct TDS	Validated
#87	Sweetex 2P Family: Sweetex 2P	Calorie reduction while maintaining full sweet taste perception.	Direct TDS	Validated
#88	Sweetex S Family: Sweetex S	Calorie reduction while maintaining full sweet taste perception.	Direct TDS	Validated
#89	Sweetex SS Family: Sweetex SS	Calorie reduction while maintaining full sweet taste perception.	Direct TDS	Validated

 Level 3 Application: Yogurt Fruit Preparations (10 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#182	AGLUPECTIN HS-MR Family: Pectin Functional Systems	Suspends whole fruit chunks in yogurts without syneresis.	Pending CoA	Proposed
#183	AGLUPECTIN HS-R-E440(I) Family: Pectin Functional Systems	Suspends whole fruit chunks in yogurts without syneresis.	Pending CoA	Proposed
#184	AGLUPECTIN HS-SB13Z Family: Pectin Functional Systems	Suspends whole fruit chunks in yogurts without syneresis.	Pending CoA	Proposed
#302	Pectin 105C Family: Pectin Functional Systems	Suspends whole fruit chunks in yogurts without syneresis.	Pending CoA	Proposed
#304	Pectin LM 101 AS Family: Pectin Functional Systems	Suspends whole fruit chunks in yogurts without syneresis.	Pending CoA	Proposed
#305	Pectin LM 102 AS Family: Pectin Functional Systems	Suspends whole fruit chunks in yogurts without syneresis.	Pending CoA	Proposed
#306	Pectin LM 104 AS Family: Pectin Functional Systems	Suspends whole fruit chunks in yogurts without syneresis.	Pending CoA	Proposed
#307	Pectin LM 104 AS - FS Family: Pectin Functional Systems	Suspends whole fruit chunks in yogurts without syneresis.	Pending CoA	Proposed
#308	Pectin LM 106 AS-YA Family: Pectin Functional Systems	Suspends whole fruit chunks in yogurts without syneresis.	Pending CoA	Proposed
#309	Pectin LM104 AS (100) Family: Pectin Functional Systems	Suspends whole fruit chunks in yogurts without syneresis.	Pending CoA	Proposed

 Level 2 Product Category: Reconstitution & Milk Processing (1 Application Matrices)

 Level 3 Application: Reconstituted Milk & Whey Processing (3 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#5	ANTIFOAM COMPOUND Family: Antifoam Compounds	Suppresses foam formation during high-shear milk powder reconstitution and whey separation.	Direct TDS	Validated
#19	Antifoam LPD Family: Antifoam Compounds	Suppresses foam formation during high-shear milk powder reconstitution and whey separation.	Direct TDS	Validated
#191	Antifoam Family: Antifoam Compounds	Suppresses foam formation during high-shear milk powder reconstitution and whey separation.	Copied Sibling	Proposed

📁 Level 2 Product Category: Cheese & Dairy Systems (1 Application Matrices)				
🔍 Level 3 Application: Processed Cheese & Dairy Spreads (44 materials)				
ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#6	Revastab - M205 Family: Revastab - M205	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#23	Fell 120 R Family: Fell 120 R	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#24	Fell 120 RX Family: Fell 120 RX	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#28	Ingresa RevaStab MC100 Family: Textra / Revastab Meat & Gelling Blends	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#29	Ingresa RevaStab MCG Family: Textra / Revastab Meat & Gelling Blends	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#30	Ingresa RevaStab MCV Family: Textra / Revastab Meat & Gelling Blends	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#32	NRC 600 Family: NRC 600	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#33	NRC500 Family: NRC500	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#34	NRC600 Family: NRC600	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#35	NRE 1400H Family: NRE 1400H	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#36	NRE1400 Family: NRE1400	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#37	NRE1600 Family: NRE1600	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#70	RevaStab ID 15 - Copy Family: RevaStab ID 15 - Copy	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#71	RevaStab ID 15 Family: RevaStab ID 15	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#72	RevaStab NF04 Family: RevaStab NF04	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#73	RevaStab PZ Family: RevaStab PZ	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#74	Revastab MCG Family: Textra / Revastab Meat & Gelling Blends	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#75	Revastab SF22 Family: Revastab SF22	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#76	Revastab-VPM 15 Family: Revastab-VPM 15	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#77	Revastab-VPM 30 Family: Revastab-VPM 30	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#78	RevastabID-06 Family: RevastabID-06	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#79	SF19 Family: SF19	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#80	SF20 Family: SF20	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#81	SF22 Family: SF22	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#90	ID-20 Family: ID-20	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#91	TEXTRA BV100 Family: TEXTRA BV100	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated

#125	textra w 138 Family: textra w 138	Functional dairy texturizer and stabilizer improving dry matter consistency, texture body, and shelf-life stability.	Direct TDS	Validated
#153	EUGENOL Family: EUGENOL	Standardized food grade functional ingredient.	Direct TDS	Validated
#167	Natural Mixed Tocopherols Family: Natural Mixed Tocopherols	Standardized food grade functional ingredient.	Direct TDS	Validated
#192	Ascorbic Acid China Family: Ascorbic Acid China	Standardized food grade functional ingredient.	Pending CoA	Proposed
#233	Dairy anti foam Family: Dairy anti foam	Standardized food grade functional ingredient.	Pending CoA	Proposed
#369	Vegatable Carbon Black Family: Vegatable Carbon Black	Standardized food grade functional ingredient.	Pending CoA	Proposed

 Level 2 Product Category: Cheese (7 Application Matrices)

 Level 3 Application: White Cheese / Feta (2 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#25	Feta 341 Family: Textra Cheese Stabilizers	Enhances curd firmness, optimizes slicing integrity, improves yield, and binds moisture stably during refrigerated brine aging.	Direct TDS	Validated
#104	Textra Feta 341 Family: Textra Cheese Stabilizers	Enhances curd firmness, optimizes slicing integrity, improves yield, and binds moisture stably during refrigerated brine aging.	Direct TDS	Validated

 Level 3 Application: Triangular Processed Cheese (4 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#26	Feta 400 Family: Textra Cheese Stabilizers	Specialized texturizer and emulsification stabilizer to prevent fat separation and eliminate oiling-off in portioned foil triangles.	Direct TDS	Validated
#95	Talaga 300 Family: Talaga 300	Specialized texturizer and emulsification stabilizer to prevent fat separation and eliminate oiling-off in portioned foil triangles.	Direct TDS	Validated
#105	Textra Feta 400 Family: Textra Cheese Stabilizers	Specialized texturizer and emulsification stabilizer to prevent fat separation and eliminate oiling-off in portioned foil triangles.	Direct TDS	Validated
#122	Textra Talaga 1000 Family: Textra Talaga 1000	Specialized texturizer and emulsification stabilizer to prevent fat separation and eliminate oiling-off in portioned foil triangles.	Direct TDS	Validated

 Level 3 Application: Spreadable Processed Cheese (4 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#26	Feta 400 Family: Textra Cheese Stabilizers	Delivers smooth velvety spreadability and emulsion stability in glass jars and plastic tubs.	Direct TDS	Validated
#95	Talaga 300 Family: Talaga 300	Delivers smooth velvety spreadability and emulsion stability in glass jars and plastic tubs.	Direct TDS	Validated
#105	Textra Feta 400 Family: Textra Cheese Stabilizers	Delivers smooth velvety spreadability and emulsion stability in glass jars and plastic tubs.	Direct TDS	Validated
#122	Textra Talaga 1000 Family: Textra Talaga 1000	Delivers smooth velvety spreadability and emulsion stability in glass jars and plastic tubs.	Direct TDS	Validated

 Level 3 Application: Processed Cheese Melting Salts (32 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#40	Phos 10 Family: Phos 10	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#41	Phos 11 Family: Phos 11	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#42	Phos 8 Family: Phos 8	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#43	Phos AC04 Family: Phos AC04	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#44	Phos B200 Family: Phos B200	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#45	Phos B250 Family: Phos B250	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#46	Phos B300 Family: Phos B300	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#47	Phos B350 Family: Phos B350	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#48	Phos CR116 Family: Phos CR116	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#49	Phos CR120 Family: Phos CR120	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#50	Phos KC12 Family: Phos KC12	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#51	Phos MSL400 Family: Phos MSL400	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#52	Phos MSL440 Family: Phos MSL440	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#53	Phos MSL500 Family: Phos MSL500	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#54	Phos MU100 Family: Phos MU100	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#55	Phos MU200 Family: Phos MU200	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#56	Phos MU300 Family: Phos MU300	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#57	Phos SP101 Family: Phos SP101	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#58	Phos SP102 Family: Phos SP102	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#59	Phos SP120 Family: Phos SP120	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#60	Phos SP122 Family: Phos SP122	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#61	Phos SP125 Family: Phos SP125	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#62	Phos SP130 Family: Phos SP130	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#63	Phos SP135 Family: Phos SP135	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#64	Phos SP140 Family: Phos SP140	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#65	Phos SP145 Family: Phos SP145	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#66	Phos SP152 Family: Phos SP152	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#67	Phos SP154 Family: Phos SP154	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#68	Phos SP227 Family: Phos SP227	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#69	Phos-BS Family: Phos-BS	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Direct TDS	Validated
#354	Sodium Hexametaphosphate (SHMP)-25kg Family: Sodium Hexametaphosphate (SHMP)-25kg	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Pending CoA	Proposed
#357	Sodium Tripolyphosphate (STPP)-25kg Family: STPP Phosphates	Chelates calcium ions to convert insoluble paracasein into smooth emulsifying protein matrix in processed cheese slices and blocks.	Pending CoA	Proposed

 Level 3 Application: Cheese Surface Protection (2 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#83	Siveele Technical Sheet Nataseen-L Family: Siveele Technical Sheet Nataseen-L	Natural antifungal/antibacterial bio-preservation preventing surface mold and bacterial spoilage without affecting fermentation cultures.	Direct TDS	Validated
#84	Siveele Technical Sheet NiseenR-S Family: Siveele Technical Sheet NiseenR-S	Natural antifungal/antibacterial bio-preservation preventing surface mold and bacterial spoilage without affecting fermentation cultures.	Direct TDS	Validated

 Level 3 Application: Hard & White Cheese Coagulation (1 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#123	Valiren 2400 Granular Family: Valiren 2400 Granular	High-purity microbial coagulant ensuring clean enzymatic milk clotting and high curd yield.	Direct TDS	Validated

 Level 3 Application: Processed Cheese (11 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#185	Annatto 2.2 WS 1KG Family: Annatto Natural Color	Stable yellow-to-orange coloration (Bixin / Norbixin) with high milk protein affinity.	Pending CoA	Proposed
#186	Annatto 4% WS 1kg Family: Annatto Natural Color	Stable yellow-to-orange coloration (Bixin / Norbixin) with high milk protein affinity.	Pending CoA	Proposed
#187	Annatto Turmeric Family: Annatto Natural Color	Stable yellow-to-orange coloration (Bixin / Norbixin) with high milk protein affinity.	Pending CoA	Proposed
#188	Annatto WS 2.2 % 5 KG Family: Annatto Natural Color	Stable yellow-to-orange coloration (Bixin / Norbixin) with high milk protein affinity.	Pending CoA	Proposed
#189	Annatto WS 3.50 % Family: Annatto Natural Color	Stable yellow-to-orange coloration (Bixin / Norbixin) with high milk protein affinity.	Pending CoA	Proposed
#190	Annatto WS 4 % 5 KG Family: Annatto Natural Color	Stable yellow-to-orange coloration (Bixin / Norbixin) with high milk protein affinity.	Pending CoA	Proposed
#196	Calcium Chloride-25kg Family: Calcium Chloride-25kg	Buffering salt assisting calcium chelation and protein emulsification.	Pending CoA	Proposed
#221	Citric Acid Anhydrous-25kg Family: Citric Acid	Buffering salt assisting calcium chelation and protein emulsification.	Pending CoA	Proposed
#253	L-Tartaric Acid China-25kg Family: L-Tartaric Acid China-25kg	Buffering salt assisting calcium chelation and protein emulsification.	Pending CoA	Proposed
#343	Potassium Citrate-25kg Family: Potassium Citrate-25kg	Buffering salt assisting calcium chelation and protein emulsification.	Pending CoA	Proposed
#351	Sodium Citrate-25kg Family: Sodium Citrate-25kg	Buffering salt assisting calcium chelation and protein emulsification.	Pending CoA	Proposed

CHAPTER 3

SNACKS & SAVORY SEASONINGS SECTOR

145 Master Products

145 Application Routes

Itemized finished-product matrix distribution, functional ingredient behavior, and physical TDS laboratory audit status:

📁 Level 2 Product Category: Topical Seasonings & Dusting (1 Application Matrices)

🔗 Level 3 Application: Potato Chips / Extruded Snacks (145 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#11	Paprika Oleoresin 20,000 CU Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Direct TDS	Validated
#127	Paprika Oleoresin 100,000 CU Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Direct TDS	Validated
#128	Rosemary Oleoresin 1001 Family: Rosemary Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#129	Thyme Oleoresin 1001 Family: Thyme Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#130	OLEORESIN TURMERIC Family: OLEORESIN TURMERIC	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#131	Pepper White Oleoresin 1001 Family: Pepper White Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#132	Pepper Black Oleoresin 1001 Family: Pepper Black Oleoresin	Instant pungent piperine impact and uniform distribution on potato/corn chips.	Direct TDS	Validated
#133	Fennel Oleoresin 1001 Family: Fennel Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#134	Oleoresin Basil Family: Oleoresin Basil	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#135	Capsicum Oleoresin 1001 Family: Capsicum Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#136	Cardamom Oleoresin 1001 Family: Cardamom Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#137	OLEORESIN CELERY Family: OLEORESIN CELERY	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#138	Cassia Oleoresin 1001 Family: Cassia / Cinnamon Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#139	Clove Bud Oleoresin 1001 Family: Clove Bud Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#140	Coriander Oleoresin 1001 Family: Coriander Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#141	Cumin Oleoresin 1001 Family: Cumin Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#142	Fenugreek Oleoresin 1001 Family: Fenugreek Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#143	Ginger Oleoresin 1001 Family: Ginger Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#144	Mace Oleoresin Family: Mace Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#145	Nutmeg Oleoresin 1001 Family: Nutmeg Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#146	Oregano Oleoresin 1001 Family: Oregano Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#147	Celery Seed Oil Family: Celery Seed Oil	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#148	CINNAMON LEAF OIL Family: CINNAMON LEAF OIL	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#149	CLOVE LEAF OIL Family: CLOVE LEAF OIL	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#150	Coriander Oleoresin 1001 Family: Coriander Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#151	Cumin Oleoresin 1001 Family: Cumin Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#152	Dill Oleoresin 1001 Family: Dill Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#154	Garlic Oleoresin 1001 Family: Garlic Oleoresin	Authentic pungent allium sulfur aroma and fresh taste notes at micro-dosage.	Direct TDS	Validated
#155	Ginger Oleoresin 1001 Family: Ginger Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#156	Mace OIL Family: Mace OIL	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#157	Mustard Oleoresin 1001 Family: Mustard Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#158	Nutmeg Oleoresin 1001 Family: Nutmeg Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#159	Onion Oleoresin 1001 Family: Onion Oleoresin	Authentic pungent allium sulfur aroma and fresh taste notes at micro-dosage.	Direct TDS	Validated
#160	Oregano Oleoresin 1001 Family: Oregano Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#161	Rosemary Oleoresin 1001 Family: Rosemary Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#162	Thyme Oleoresin 1001 Family: Thyme Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#163	Aniseed Oil Family: Aniseed Oil	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#164	Pepper Black Oleoresin 1001 Family: Pepper Black Oleoresin	Instant pungent piperine impact and uniform distribution on potato/corn chips.	Direct TDS	Validated
#165	Cardamom Oleoresin 1001 Family: Cardamom Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#166	Cassia Oleoresin 1001 Family: Cassia / Cinnamon Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#168	Thyme Oleoresin 1001 Family: Thyme Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#169	Oleoresin Basil Family: Oleoresin Basil	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#170	Oregano Oleoresin 1001 Family: Oregano Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#171	Rosemary Oleoresin 1001 Family: Rosemary Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#172	Oleoresin spinach Family: Oleoresin spinach	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#173	Burger Spice Blend Family: Burger Spice Blend	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#174	HOT DOG SPICE BLEND Family: HOT DOG SPICE BLEND	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#175	Ketch up oil 1001 - SM Family: Ketch up oil 1001 - SM	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#176	Kofta Spice Blend Family: Kofta Spice Blend	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#177	Luncheon Spice Blend Family: Luncheon Spice Blend	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#178	Oriental Sausage Spice Blend Family: Oriental Sausage Spice Blend	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#179	Pastrami Spice Blend Family: Pastrami Spice Blend	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#180	Pizza Spice Blend Family: Pizza Spice Blend	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#181	Roasted Beef Spice Blend Family: Roasted Beef Spice Blend	Concentrated standardized spice flavor profile for topical dusting and snacks.	Direct TDS	Validated
#185	Annatto 2.2 WS 1KG Family: Annatto Natural Color	Delivers bright golden cheese and butter hues on snack dusting.	Pending CoA	Proposed
#186	Annatto 4% WS 1kg Family: Annatto Natural Color	Delivers bright golden cheese and butter hues on snack dusting.	Pending CoA	Proposed
#187	Annatto Turmeric Family: Annatto Natural Color	Delivers bright golden cheese and butter hues on snack dusting.	Pending CoA	Proposed
#188	Annatto WS 2.2 % 5 KG Family: Annatto Natural Color	Delivers bright golden cheese and butter hues on snack dusting.	Pending CoA	Proposed
#189	Annatto WS 3.50 % Family: Annatto Natural Color	Delivers bright golden cheese and butter hues on snack dusting.	Pending CoA	Proposed
#190	Annatto WS 4 % 5 KG Family: Annatto Natural Color	Delivers bright golden cheese and butter hues on snack dusting.	Pending CoA	Proposed
#199	Capsicum Oleoresin 1000 Family: Capsicum Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Copied Sibling	Proposed
#200	Capsicum Oleoresin 1002 Family: Capsicum Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Copied Sibling	Proposed
#201	Capsicum Oleoresin 1003 Family: Capsicum Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Copied Sibling	Proposed
#202	Capsicum Oleoresin 500,000 SHU Family: Capsicum Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Copied Sibling	Proposed
#211	Cardamom Oleoresin 1002 Family: Cardamom Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Copied Sibling	Proposed
#238	Garlic Oleoresin 1002 Family: Garlic Oleoresin	Authentic pungent allium sulfur aroma and fresh taste notes at micro-dosage.	Copied Sibling	Proposed
#239	Garlic Oleoresin 1003 Family: Garlic Oleoresin	Authentic pungent allium sulfur aroma and fresh taste notes at micro-dosage.	Copied Sibling	Proposed
#240	Garlic Oleoresin 1004 Family: Garlic Oleoresin	Authentic pungent allium sulfur aroma and fresh taste notes at micro-dosage.	Copied Sibling	Proposed
#241	Garlic Oleoresin 1005 Family: Garlic Oleoresin	Authentic pungent allium sulfur aroma and fresh taste notes at micro-dosage.	Copied Sibling	Proposed
#242	Garlic Oleoresin 50/50 Family: Garlic Oleoresin	Authentic pungent allium sulfur aroma and fresh taste notes at micro-dosage.	Copied Sibling	Proposed
#243	Garlic Oleoresin 60/40 Family: Garlic Oleoresin	Authentic pungent allium sulfur aroma and fresh taste notes at micro-dosage.	Copied Sibling	Proposed
#249	Laurel Oleoresin 1001 Family: Laurel Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Pending CoA	Proposed
#257	Marjoram Oleoresin 1001 Family: Marjoram Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Pending CoA	Proposed
#261	Onion Oleoresin 1002 Family: Onion Oleoresin	Authentic pungent allium sulfur aroma and fresh taste notes at micro-dosage.	Copied Sibling	Proposed
#262	Onion Oleoresin 1003 Family: Onion Oleoresin	Authentic pungent allium sulfur aroma and fresh taste notes at micro-dosage.	Copied Sibling	Proposed

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#263	Onion Oleoresin 1004 Family: Onion Oleoresin	Authentic pungent allium sulfur aroma and fresh taste notes at micro-dosage.	Copied Sibling	Proposed
#264	Onion Oleoresin 50/50 Family: Onion Oleoresin	Authentic pungent allium sulfur aroma and fresh taste notes at micro-dosage.	Copied Sibling	Proposed
#265	Onion Oleoresin 60/40 Family: Onion Oleoresin	Authentic pungent allium sulfur aroma and fresh taste notes at micro-dosage.	Copied Sibling	Proposed
#266	Onion Oleoresin 70/30 Family: Onion Oleoresin	Authentic pungent allium sulfur aroma and fresh taste notes at micro-dosage.	Copied Sibling	Proposed
#267	Onion Oleoresin 80/20 Family: Onion Oleoresin	Authentic pungent allium sulfur aroma and fresh taste notes at micro-dosage.	Copied Sibling	Proposed
#268	Onion Oleoresin 90/10 Family: Onion Oleoresin	Authentic pungent allium sulfur aroma and fresh taste notes at micro-dosage.	Copied Sibling	Proposed
#269	Paprika Oleoresin 1000 Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#270	Paprika Oleoresin 1001 Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#271	Paprika Oleoresin 1002 Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#272	Paprika Oleoresin 1003 Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#273	Paprika Oleoresin 1004 Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#274	Paprika Oleoresin 1005 Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#275	Paprika Oleoresin 1006 Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#276	Paprika Oleoresin 1007 Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#277	Paprika Oleoresin 1008 Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#278	Paprika Oleoresin 1009 Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#279	Paprika Oleoresin 1010 Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#280	Paprika Oleoresin 1011 Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#281	Paprika Oleoresin 1012 Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#282	Paprika Oleoresin 1013 Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#283	Paprika Oleoresin 1014 Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#284	Paprika Oleoresin 1015 Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#285	Paprika Oleoresin 1016 Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#286	Paprika Oleoresin 1017 Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#287	Paprika Oleoresin 1018 Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#288	Paprika Oleoresin 1019 Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#289	Paprika Oleoresin 1020 Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#290	Paprika Oleoresin 1021 Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#291	Paprika Oleoresin 1022 Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#292	Paprika Oleoresin 1023 Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#293	Paprika Oleoresin 40,000 CU Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#294	Paprika Oleoresin 40,000 CU OS Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#295	Paprika Oleoresin 40,000 CU WS Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#296	Paprika Oleoresin 60,000 CU Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#297	Paprika Oleoresin 80,000 CU Family: Paprika Oleoresin	Standardized carotenoid color (ASTA / Color Units) combined with authentic sweet paprika aroma.	Copied Sibling	Proposed
#298	Parsley Oleoresin 1001 Family: Parsley Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Pending CoA	Proposed
#299	Parsley Oleoresin 1002 Family: Parsley Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Pending CoA	Proposed
#300	Parsley Oleoresin 1003 Family: Parsley Oleoresin	Concentrated standardized spice flavor profile for topical dusting and snacks.	Pending CoA	Proposed
#311	Pepper Black Oleoresin 1002 Family: Pepper Black Oleoresin	Instant pungent piperine impact and uniform distribution on potato/corn chips.	Copied Sibling	Proposed
#312	Pepper Black Oleoresin 1003 Family: Pepper Black Oleoresin	Instant pungent piperine impact and uniform distribution on potato/corn chips.	Copied Sibling	Proposed
#313	Pepper Black Oleoresin 1004 Family: Pepper Black Oleoresin	Instant pungent piperine impact and uniform distribution on potato/corn chips.	Copied Sibling	Proposed
#314	Pepper Black Oleoresin 1005 Family: Pepper Black Oleoresin	Instant pungent piperine impact and uniform distribution on potato/corn chips.	Copied Sibling	Proposed
#315	Pepper Black Oleoresin 1006 Family: Pepper Black Oleoresin	Instant pungent piperine impact and uniform distribution on potato/corn chips.	Copied Sibling	Proposed
#316	Pepper Black Oleoresin 1007 Family: Pepper Black Oleoresin	Instant pungent piperine impact and uniform distribution on potato/corn chips.	Copied Sibling	Proposed
#317	Pepper Black Oleoresin 1008 Family: Pepper Black Oleoresin	Instant pungent piperine impact and uniform distribution on potato/corn chips.	Copied Sibling	Proposed
#318	Pepper Black Oleoresin 1009 Family: Pepper Black Oleoresin	Instant pungent piperine impact and uniform distribution on potato/corn chips.	Copied Sibling	Proposed
#319	Pepper Black Oleoresin 1010 Family: Pepper Black Oleoresin	Instant pungent piperine impact and uniform distribution on potato/corn chips.	Copied Sibling	Proposed
#320	Pepper Black Oleoresin 1011 Family: Pepper Black Oleoresin	Instant pungent piperine impact and uniform distribution on potato/corn chips.	Copied Sibling	Proposed
#321	Pepper Black Oleoresin 1012 Family: Pepper Black Oleoresin	Instant pungent piperine impact and uniform distribution on potato/corn chips.	Copied Sibling	Proposed
#322	Pepper Black Oleoresin 1013 Family: Pepper Black Oleoresin	Instant pungent piperine impact and uniform distribution on potato/corn chips.	Copied Sibling	Proposed
#323	Pepper Black Oleoresin 1014 Family: Pepper Black Oleoresin	Instant pungent piperine impact and uniform distribution on potato/corn chips.	Copied Sibling	Proposed

CHAPTER 4

SAUCES, CONDIMENTS & DRESSINGS SECTOR

109 Master Products

109 Application Routes

Itemized finished-product matrix distribution, functional ingredient behavior, and physical TDS laboratory audit status:

📁 Level 2 Product Category: Sauces & Starch Cooking (1 Application Matrices)				
🔗 Level 3 Application: Ketchup & Starch Washing (3 materials)				
ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#5	ANTI-FOAM COMPOUND Family: Antifoam Compounds	Bubble suppression during sauce cooking, starch gelatinization, and potato washing.	Direct TDS	Validated
#19	Antifoam LPD Family: Antifoam Compounds	Bubble suppression during sauce cooking, starch gelatinization, and potato washing.	Direct TDS	Validated
#191	Antifoam Family: Antifoam Compounds	Bubble suppression during sauce cooking, starch gelatinization, and potato washing.	Copied Sibling	Proposed
📁 Level 2 Product Category: Tomato & Table Sauces (1 Application Matrices)				
🔗 Level 3 Application: Ketchup & BBQ Sauces (46 materials)				
ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#7	REVATEX -TS4 Family: Textra Modified Starches	Delivers freeze-thaw stability, high shear resistance, glossy sheen, and smooth texture.	Direct TDS	Validated
#11	Paprika Oleoresin 20,000 CU Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Direct TDS	Validated
#18	Corn Starch-Local-25kg Family: Corn Starch-Local-25kg	Delivers freeze-thaw stability, high shear resistance, glossy sheen, and smooth texture.	Direct TDS	Validated
#82	STARPRO - PDS (HP-CF T0577) Tapioca Family: STARPRO - PDS (HP-CF T0577) Tapioca	Delivers freeze-thaw stability, high shear resistance, glossy sheen, and smooth texture.	Direct TDS	Validated
#106	Textra MA243 Family: Textra Modified Starches	Delivers freeze-thaw stability, high shear resistance, glossy sheen, and smooth texture.	Direct TDS	Validated
#107	Textra MS 4060 Family: Textra Modified Starches	Delivers freeze-thaw stability, high shear resistance, glossy sheen, and smooth texture.	Direct TDS	Validated
#108	Textra MS Pro Family: Textra Modified Starches	Delivers freeze-thaw stability, high shear resistance, glossy sheen, and smooth texture.	Direct TDS	Validated
#126	Solvarin ACAD-B Family: Solvarin ACAD-B	Delivers freeze-thaw stability, high shear resistance, glossy sheen, and smooth texture.	Direct TDS	Validated
#127	Paprika Oleoresin 100,000 CU Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Direct TDS	Validated
#203	Caramel (E150D) Family: Caramel Color	Provides dark rich brown color in soy sauces and BBQ glazes.	Pending CoA	Proposed
#204	Caramel liquid Type E150A 30KG Family: Caramel Color	Provides dark rich brown color in soy sauces and BBQ glazes.	Pending CoA	Proposed
#205	Caramel Liquid Type E150D Family: Caramel Color	Provides dark rich brown color in soy sauces and BBQ glazes.	Pending CoA	Proposed
#206	Caramel Liquid Type E150D 30KG Family: Caramel Color	Provides dark rich brown color in soy sauces and BBQ glazes.	Pending CoA	Proposed
#207	Caramel Powder (E150D) Family: Caramel Color	Provides dark rich brown color in soy sauces and BBQ glazes.	Pending CoA	Proposed
#208	Caramel powder Type E150A 20KG Family: Caramel Color	Provides dark rich brown color in soy sauces and BBQ glazes.	Pending CoA	Proposed

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#209	Caramel powder Type E150c 20KG Family: Caramel Color	Provides dark rich brown color in soy sauces and BBQ glazes.	Pending CoA	Proposed
#210	Caramel powder Type E150d 20KG Family: Caramel Color	Provides dark rich brown color in soy sauces and BBQ glazes.	Pending CoA	Proposed
#269	Paprika Oleoresin 1000 Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#270	Paprika Oleoresin 1001 Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#271	Paprika Oleoresin 1002 Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#272	Paprika Oleoresin 1003 Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#273	Paprika Oleoresin 1004 Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#274	Paprika Oleoresin 1005 Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#275	Paprika Oleoresin 1006 Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#276	Paprika Oleoresin 1007 Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#277	Paprika Oleoresin 1008 Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#278	Paprika Oleoresin 1009 Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#279	Paprika Oleoresin 1010 Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#280	Paprika Oleoresin 1011 Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#281	Paprika Oleoresin 1012 Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#282	Paprika Oleoresin 1013 Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#283	Paprika Oleoresin 1014 Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#284	Paprika Oleoresin 1015 Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#285	Paprika Oleoresin 1016 Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#286	Paprika Oleoresin 1017 Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#287	Paprika Oleoresin 1018 Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#288	Paprika Oleoresin 1019 Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#289	Paprika Oleoresin 1020 Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#290	Paprika Oleoresin 1021 Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#291	Paprika Oleoresin 1022 Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#292	Paprika Oleoresin 1023 Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#293	Paprika Oleoresin 40,000 CU Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#294	Paprika Oleoresin 40,000 CU OS Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#295	Paprika Oleoresin 40,000 CU WS Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#296	Paprika Oleoresin 60,000 CU Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed
#297	Paprika Oleoresin 80,000 CU Family: Paprika Oleoresin	Enhances tomato hue and warm spice background in sauces.	Copied Sibling	Proposed

 Level 2 Product Category: Emulsified Sauces & Dips (1 Application Matrices)

 Level 3 Application: Mayonnaise / Salad Dressings (26 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#9	Microcrystalline Cellulose Gel (Type: H811F) Family: Microcrystalline Cellulose Gel (Type: H811F)	Thixotropic network builder providing fat-like body and suspension stability.	Direct TDS	Validated
#154	Garlic Oleoresin 1001 Family: Garlic Oleoresin	Provides garlic/onion top notes in dressings, ranch, and dipping sauces.	Direct TDS	Validated
#159	Onion Oleoresin 1001 Family: Onion Oleoresin	Provides garlic/onion top notes in dressings, ranch, and dipping sauces.	Direct TDS	Validated
#238	Garlic Oleoresin 1002 Family: Garlic Oleoresin	Provides garlic/onion top notes in dressings, ranch, and dipping sauces.	Copied Sibling	Proposed
#239	Garlic Oleoresin 1003 Family: Garlic Oleoresin	Provides garlic/onion top notes in dressings, ranch, and dipping sauces.	Copied Sibling	Proposed
#240	Garlic Oleoresin 1004 Family: Garlic Oleoresin	Provides garlic/onion top notes in dressings, ranch, and dipping sauces.	Copied Sibling	Proposed
#241	Garlic Oleoresin 1005 Family: Garlic Oleoresin	Provides garlic/onion top notes in dressings, ranch, and dipping sauces.	Copied Sibling	Proposed
#242	Garlic Oleoresin 50/50 Family: Garlic Oleoresin	Provides garlic/onion top notes in dressings, ranch, and dipping sauces.	Copied Sibling	Proposed
#243	Garlic Oleoresin 60/40 Family: Garlic Oleoresin	Provides garlic/onion top notes in dressings, ranch, and dipping sauces.	Copied Sibling	Proposed
#261	Onion Oleoresin 1002 Family: Onion Oleoresin	Provides garlic/onion top notes in dressings, ranch, and dipping sauces.	Copied Sibling	Proposed
#262	Onion Oleoresin 1003 Family: Onion Oleoresin	Provides garlic/onion top notes in dressings, ranch, and dipping sauces.	Copied Sibling	Proposed
#263	Onion Oleoresin 1004 Family: Onion Oleoresin	Provides garlic/onion top notes in dressings, ranch, and dipping sauces.	Copied Sibling	Proposed
#264	Onion Oleoresin 50/50 Family: Onion Oleoresin	Provides garlic/onion top notes in dressings, ranch, and dipping sauces.	Copied Sibling	Proposed
#265	Onion Oleoresin 60/40 Family: Onion Oleoresin	Provides garlic/onion top notes in dressings, ranch, and dipping sauces.	Copied Sibling	Proposed
#266	Onion Oleoresin 70/30 Family: Onion Oleoresin	Provides garlic/onion top notes in dressings, ranch, and dipping sauces.	Copied Sibling	Proposed
#267	Onion Oleoresin 80/20 Family: Onion Oleoresin	Provides garlic/onion top notes in dressings, ranch, and dipping sauces.	Copied Sibling	Proposed

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#268	Onion Oleoresin 90/10 Family: Onion Oleoresin	Provides garlic/onion top notes in dressings, ranch, and dipping sauces.	Copied Sibling	Proposed
#344	Potassium Sorbate Granular-25kg Family: Potassium Sorbate	Prevents spoilage and extends ambient shelf life in table sauces.	Pending CoA	Proposed
#345	Potassium Sorbate Powder-25kg Family: Potassium Sorbate	Prevents spoilage and extends ambient shelf life in table sauces.	Pending CoA	Proposed
#349	Sodium Benzoate China-25kg Family: Sodium Benzoate	Prevents spoilage and extends ambient shelf life in table sauces.	Pending CoA	Proposed
#350	Sodium Benzoate Wuhan-25kg Family: Sodium Benzoate	Prevents spoilage and extends ambient shelf life in table sauces.	Pending CoA	Proposed
#371	Xanthan Gum (200 Mesh) Family: Xanthan Gum	Pseudoplastic shear-thinning viscosity, permanent emulsion stability, and high cling.	Pending CoA	Proposed
#372	Xanthan Gum (80 Mesh) Family: Xanthan Gum	Pseudoplastic shear-thinning viscosity, permanent emulsion stability, and high cling.	Pending CoA	Proposed
#373	Xanthan Gum Clear Family: Xanthan Gum	Pseudoplastic shear-thinning viscosity, permanent emulsion stability, and high cling.	Pending CoA	Proposed
#374	Xanthan Gum F80 Family: Xanthan Gum	Pseudoplastic shear-thinning viscosity, permanent emulsion stability, and high cling.	Pending CoA	Proposed
#375	Xanthan Gum Transparent Family: Xanthan Gum	Pseudoplastic shear-thinning viscosity, permanent emulsion stability, and high cling.	Pending CoA	Proposed

 Level 2 Product Category: Marinades & Pickling (1 Application Matrices)

 Level 3 Application: Meat / Poultry Marinades (34 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#132	Pepper Black Oleoresin 1001 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Direct TDS	Validated
#164	Pepper Black Oleoresin 1001 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Direct TDS	Validated
#311	Pepper Black Oleoresin 1002 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#312	Pepper Black Oleoresin 1003 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#313	Pepper Black Oleoresin 1004 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#314	Pepper Black Oleoresin 1005 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#315	Pepper Black Oleoresin 1006 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#316	Pepper Black Oleoresin 1007 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#317	Pepper Black Oleoresin 1008 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#318	Pepper Black Oleoresin 1009 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#319	Pepper Black Oleoresin 1010 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#320	Pepper Black Oleoresin 1011 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#321	Pepper Black Oleoresin 1012 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#322	Pepper Black Oleoresin 1013 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#323	Pepper Black Oleoresin 1014 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#324	Pepper Black Oleoresin 1015 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#325	Pepper Black Oleoresin 1016 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#326	Pepper Black Oleoresin 1017 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#327	Pepper Black Oleoresin 1018 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#328	Pepper Black Oleoresin 1019 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#329	Pepper Black Oleoresin 1020 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#330	Pepper Black Oleoresin 1021 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#331	Pepper Black Oleoresin 1022 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#332	Pepper Black Oleoresin 1023 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#333	Pepper Black Oleoresin 1024 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#334	Pepper Black Oleoresin 1025 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#335	Pepper Black Oleoresin 1026 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#336	Pepper Black Oleoresin 1027 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#337	Pepper Black Oleoresin 1028 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#338	Pepper Black Oleoresin 1029 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#339	Pepper Black Oleoresin 1030 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#340	Pepper Black Oleoresin 1031 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#341	Pepper Black Oleoresin 1032 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed
#342	Pepper Black Oleoresin 40/20 Family: Pepper Black Oleoresin	Standardized spice profile for tumbling marinades and table gravies.	Copied Sibling	Proposed

CHAPTER 5

BAKERY SECTOR

99 Master Products

100 Application Routes

Itemized finished-product matrix distribution, functional ingredient behavior, and physical TDS laboratory audit status:

📁 Level 2 Product Category: Cake & Bakery (6 Application Matrices)				
🔗 Level 3 Application: Sponge Cake / Muffin (7 materials)				
ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#1	GMS (Mono & Diglycerides of Fatty Acids) Family: GMS (Mono & Diglycerides of Fatty Acids)	Promotes rapid batter aeration, fine crumb structure, moisture retention, and anti-staling softness.	Direct TDS	Validated
#13	Tex Mono 160 Family: Tex Emulsifiers (Mono & Diglycerides)	Promotes rapid batter aeration, fine crumb structure, moisture retention, and anti-staling softness.	Direct TDS	Validated
#15	Textra Baking 100 Family: Textra Bakery & Leavening Systems	Engineered double-acting chemical leavening blend ensuring controlled CO2 release for maximum batter volume.	Direct TDS	Validated
#16	Textra Baking 150 Family: Textra Bakery & Leavening Systems	Engineered double-acting chemical leavening blend ensuring controlled CO2 release for maximum batter volume.	Direct TDS	Validated
#17	Textra CM 110 Family: Textra Dairy & Ice Cream Stabilizers	Promotes rapid batter aeration, fine crumb structure, moisture retention, and anti-staling softness.	Direct TDS	Validated
#222	Citric Acid Monohydrate Family: Citric Acid	Promotes rapid batter aeration, fine crumb structure, moisture retention, and anti-staling softness.	Pending CoA	Proposed
#235	Dextrose Monohydrate-25kg Family: Dextrose	Promotes rapid batter aeration, fine crumb structure, moisture retention, and anti-staling softness.	Pending CoA	Proposed
🔗 Level 3 Application: Sponge Cake & Pastry Fillings (37 materials)				
ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#6	Revastab - M205 Family: Revastab - M205	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#23	Fell 120 R Family: Fell 120 R	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#24	Fell 120 RX Family: Fell 120 RX	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#28	Ingreva RevaStab MC100 Family: Textra / Revastab Meat & Gelling Blends	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#29	Ingreva RevaStab MCG Family: Textra / Revastab Meat & Gelling Blends	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#30	Ingreva RevaStab MCV Family: Textra / Revastab Meat & Gelling Blends	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#32	NRC 600 Family: NRC 600	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#33	NRC500 Family: NRC500	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#34	NRC600 Family: NRC600	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#35	NRE 1400H Family: NRE 1400H	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#36	NRE1400 Family: NRE1400	Texture enhancement and moisture stabilization.	Direct TDS	Validated

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#37	NRE1600 Family: NRE1600	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#70	RevaStab ID 15 - Copy Family: RevaStab ID 15 - Copy	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#71	RevaStab ID 15 Family: RevaStab ID 15	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#72	RevaStab NF04 Family: RevaStab NF04	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#73	RevaStab PZ Family: RevaStab PZ	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#74	Revastab MCG Family: Textra / Revastab Meat & Gelling Blends	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#75	Revastab SF22 Family: Revastab SF22	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#76	Revastab-VPM 15 Family: Revastab-VPM 15	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#77	Revastab-VPM 30 Family: Revastab-VPM 30	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#78	RevastabID-06 Family: RevastabID-06	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#79	SF19 Family: SF19	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#80	SF20 Family: SF20	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#81	SF22 Family: SF22	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#90	ID-20 Family: ID-20	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#91	TEXTRA BV100 Family: TEXTRA BV100	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#92	TEXTRA _ D237 Family: TEXTRA _ D237	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#96	Textra - D237 Family: Textra - D237	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#97	Textra BV238 Family: Textra BV238	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#101	Textra F 136 Family: Textra F 136	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#102	Textra FM 200X Family: Textra FM 200X	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#103	Textra Feta 152 Family: Textra Cheese Stabilizers	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#109	Textra ND203 Family: Textra ND203	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#111	Textra P106 Family: Textra / Revastab Meat & Gelling Blends	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#117	Textra P106 R Family: Textra / Revastab Meat & Gelling Blends	Texture enhancement and moisture stabilization.	Direct TDS	Validated
#118	Textra P106 X Family: Textra / Revastab Meat & Gelling Blends	Texture enhancement and moisture stabilization.	Direct TDS	Validated

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#125	textra w 138 Family: textra w 138	Texture enhancement and moisture stabilization.	Direct TDS	Validated
🔗 Level 3 Application: Cakes, Cookies & Wafers (1 materials)				
ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#124	Vanillia-01 Family: Vanillia-01	Heat-stable rich vanilla aroma and sweet dairy notes in baked goods.	Direct TDS	Validated
🔗 Level 3 Application: Cookies / Biscuits / Wafers (9 materials)				
ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#223	Cocoa Butter Substitute-local-25kg Family: Cocoa Powders & Fats	Provides flavor and color in chocolate doughs, cookies, and sandwich fillings.	Pending CoA	Proposed
#224	Cocoa Powder G100-25kg Family: Cocoa Powders & Fats	Provides flavor and color in chocolate doughs, cookies, and sandwich fillings.	Pending CoA	Proposed
#225	Cocoa Powder JB800-25kg Family: Cocoa Powders & Fats	Provides flavor and color in chocolate doughs, cookies, and sandwich fillings.	Pending CoA	Proposed
#226	Cocoa Powder S9-25kg Family: Cocoa Powders & Fats	Provides flavor and color in chocolate doughs, cookies, and sandwich fillings.	Pending CoA	Proposed
#227	Cocoa Powder SL60-25kg Family: Cocoa Powders & Fats	Provides flavor and color in chocolate doughs, cookies, and sandwich fillings.	Pending CoA	Proposed
#228	Cocoa Powder SP70-25kg Family: Cocoa Powders & Fats	Provides flavor and color in chocolate doughs, cookies, and sandwich fillings.	Pending CoA	Proposed
#229	Cocoa Powder V98-25kg Family: Cocoa Powders & Fats	Provides flavor and color in chocolate doughs, cookies, and sandwich fillings.	Pending CoA	Proposed
#246	HAZELNUT PASTE Family: HAZELNUT PASTE	Provides flavor and color in chocolate doughs, cookies, and sandwich fillings.	Pending CoA	Proposed
#247	HAZELNUT PASTE TYPE C Family: HAZELNUT PASTE TYPE C	Provides flavor and color in chocolate doughs, cookies, and sandwich fillings.	Pending CoA	Proposed
🔗 Level 3 Application: Sponge Cake & Cookies (5 materials)				
ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#234	Dextrose Anhydrous-25kg Family: Dextrose	Moisture retention, browning, and structural bulk.	Pending CoA	Proposed
#248	Lactose-Imported-25kg Family: Lactose-Imported-25kg	Moisture retention, browning, and structural bulk.	Pending CoA	Proposed
#250	Lemon cloud Family: Lemon cloud	Moisture retention, browning, and structural bulk.	Pending CoA	Proposed
#256	Maltodextrine-Local-25kg Family: Maltodextrine-Local-25kg	Moisture retention, browning, and structural bulk.	Pending CoA	Proposed
#260	Non Dairy Creamer Family: Non Dairy Creamer	Moisture retention, browning, and structural bulk.	Pending CoA	Proposed
🔗 Level 3 Application: Sponge Cake / Muffin Leavening (1 materials)				
ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#347	Sodium Acid Pyrophosphate (SAPP28)-25kg Family: Sodium Acid Pyrophosphate (SAPP28)-25kg	Controls acid-reaction rate in chemical leavening systems for cake batters and biscuits.	Pending CoA	Proposed
📁 Level 2 Product Category: Pastry Fillings (1 Application Matrices)				
🔗 Level 3 Application: Bake-Stable Jams & Pie Fillings (17 materials)				

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#7	REVATEX -TS4 Family: Textra Modified Starches	Bake-stable body builder in fruit custards and fillings.	Direct TDS	Validated
#18	Corn Starch-Local-25kg Family: Corn Starch-Local-25kg	Bake-stable body builder in fruit custards and fillings.	Direct TDS	Validated
#82	STARPRO - PDS (HP-CF T0577) Tapioca Family: STARPRO - PDS (HP-CF T0577) Tapioca	Bake-stable body builder in fruit custards and fillings.	Direct TDS	Validated
#106	Textra MA243 Family: Textra Modified Starches	Bake-stable body builder in fruit custards and fillings.	Direct TDS	Validated
#107	Textra MS 4060 Family: Textra Modified Starches	Bake-stable body builder in fruit custards and fillings.	Direct TDS	Validated
#108	Textra MS Pro Family: Textra Modified Starches	Bake-stable body builder in fruit custards and fillings.	Direct TDS	Validated
#126	Solvarin ACAD-B Family: Solvarin ACAD-B	Bake-stable body builder in fruit custards and fillings.	Direct TDS	Validated
#182	AGLUPECTIN HS-MR Family: Pectin Functional Systems	Bake-stable gelling resisting boil-out during oven baking.	Pending CoA	Proposed
#183	AGLUPECTIN HS-R-E440(I) Family: Pectin Functional Systems	Bake-stable gelling resisting boil-out during oven baking.	Pending CoA	Proposed
#184	AGLUPECTIN HS-SB13Z Family: Pectin Functional Systems	Bake-stable gelling resisting boil-out during oven baking.	Pending CoA	Proposed
#302	Pectin 105C Family: Pectin Functional Systems	Bake-stable gelling resisting boil-out during oven baking.	Pending CoA	Proposed
#304	Pectin LM 101 AS Family: Pectin Functional Systems	Bake-stable gelling resisting boil-out during oven baking.	Pending CoA	Proposed
#305	Pectin LM 102 AS Family: Pectin Functional Systems	Bake-stable gelling resisting boil-out during oven baking.	Pending CoA	Proposed
#306	Pectin LM 104 AS Family: Pectin Functional Systems	Bake-stable gelling resisting boil-out during oven baking.	Pending CoA	Proposed
#307	Pectin LM 104 AS - FS Family: Pectin Functional Systems	Bake-stable gelling resisting boil-out during oven baking.	Pending CoA	Proposed
#308	Pectin LM 106 AS-YA Family: Pectin Functional Systems	Bake-stable gelling resisting boil-out during oven baking.	Pending CoA	Proposed
#309	Pectin LM104 AS (100) Family: Pectin Functional Systems	Bake-stable gelling resisting boil-out during oven baking.	Pending CoA	Proposed

 Level 2 Product Category: Bread & Nutrition (1 Application Matrices)

 Level 3 Application: High-Protein Bread & Energy Bars (11 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#8	TVP Soya Local Family: Soya Proteins & TVP	Enhances dough water absorption, strengthens gluten matrix, and boosts nutritional protein content.	Direct TDS	Validated
#93	TVP TDS-A+ Family: TVP TDS-A+	Enhances dough water absorption, strengthens gluten matrix, and boosts nutritional protein content.	Direct TDS	Validated
#94	TVP Family: TVP	Enhances dough water absorption, strengthens gluten matrix, and boosts nutritional protein content.	Direct TDS	Validated
#236	Fish Collagen Family: Fish Collagen	Enhances dough water absorption, strengthens gluten matrix, and boosts nutritional protein content.	Pending CoA	Proposed
#259	Meat Protein Family: Meat Protein	Enhances dough water absorption, strengthens gluten matrix, and boosts nutritional protein content.	Pending CoA	Proposed
#358	Soya Protein Concentrate 70% Family: Soya Proteins & TVP	Enhances dough water absorption, strengthens gluten matrix, and boosts nutritional protein content.	Copied Sibling	Proposed

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#359	Soya Protein Isolate 90% Family: Soya Proteins & TVP	Enhances dough water absorption, strengthens gluten matrix, and boosts nutritional protein content.	Copied Sibling	Proposed
#360	Soya Protein Isolate 90% (Gelling) Family: Soya Proteins & TVP	Enhances dough water absorption, strengthens gluten matrix, and boosts nutritional protein content.	Copied Sibling	Proposed
#361	Soya Protein Isolate 90% (Injection) Family: Soya Proteins & TVP	Enhances dough water absorption, strengthens gluten matrix, and boosts nutritional protein content.	Copied Sibling	Proposed
#368	TVP Soya Local - S Family: Soya Proteins & TVP	Enhances dough water absorption, strengthens gluten matrix, and boosts nutritional protein content.	Copied Sibling	Proposed
#370	Whey Protein Concentrate 80% (WPC 80) Family: Whey Protein Concentrate 80% (WPC 80)	Enhances dough water absorption, strengthens gluten matrix, and boosts nutritional protein content.	Pending CoA	Proposed

 Level 2 Product Category: Pastry (1 Application Matrices)

 Level 3 Application: Croissant / Laminated Pastry (1 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#14	Textra Bake C 10 Family: Textra Bakery & Leavening Systems	Strengthens gluten matrix, improves dough extensibility, and provides flaky crumb lamination.	Direct TDS	Validated

 Level 2 Product Category: Bread (2 Application Matrices)

 Level 3 Application: Sliced Bread / Buns / Rolls (6 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#14	Textra Bake C 10 Family: Textra Bakery & Leavening Systems	Improves gas retention and bread oven spring.	Direct TDS	Validated
#197	Calcium Propionate China-25kg Family: Calcium Propionate	Inhibits mold (Aspergillus, Penicillium) extending shelf-life by 7-14 days.	Pending CoA	Proposed
#198	Calcium Propionate Macco-20kg Family: Calcium Propionate	Inhibits mold (Aspergillus, Penicillium) extending shelf-life by 7-14 days.	Pending CoA	Proposed
#244	Guar gum - 5000 CPS Family: Guar Gum	Increases dough water absorption and crumb softness.	Pending CoA	Proposed
#245	Guar gum - 6000 CPS Family: Guar Gum	Increases dough water absorption and crumb softness.	Pending CoA	Proposed
#252	Locust Bean Gum Family: Locust Bean Gum	Increases dough water absorption and crumb softness.	Pending CoA	Proposed

 Level 3 Application: Pita / Tortilla / Flatbread (5 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#371	Xanthan Gum (200 Mesh) Family: Xanthan Gum	Moisture retention, softness, and gluten replacement in gluten-free bakery.	Pending CoA	Proposed
#372	Xanthan Gum (80 Mesh) Family: Xanthan Gum	Moisture retention, softness, and gluten replacement in gluten-free bakery.	Pending CoA	Proposed
#373	Xanthan Gum Clear Family: Xanthan Gum	Moisture retention, softness, and gluten replacement in gluten-free bakery.	Pending CoA	Proposed
#374	Xanthan Gum F80 Family: Xanthan Gum	Moisture retention, softness, and gluten replacement in gluten-free bakery.	Pending CoA	Proposed
#375	Xanthan Gum Transparent Family: Xanthan Gum	Moisture retention, softness, and gluten replacement in gluten-free bakery.	Pending CoA	Proposed

CHAPTER 6

BEVERAGES SECTOR

48 Master Products

48 Application Routes

Itemized finished-product matrix distribution, functional ingredient behavior, and physical TDS laboratory audit status:

📁 Level 2 Product Category: Processing & Bottling (1 Application Matrices)				
🔗 Level 3 Application: Carbonated Bottling & Juice Degassing (3 materials)				
ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#5	ANTI-FOAM COMPOUND Family: Antifoam Compounds	Rapid foam knockdown during carbonated beverage bottling and thermal fruit juice processing.	Direct TDS	Validated
#19	Antifoam LPD Family: Antifoam Compounds	Rapid foam knockdown during carbonated beverage bottling and thermal fruit juice processing.	Direct TDS	Validated
#191	Antifoam Family: Antifoam Compounds	Rapid foam knockdown during carbonated beverage bottling and thermal fruit juice processing.	Copied Sibling	Proposed
📁 Level 2 Product Category: Carbonated Drinks & Juices (1 Application Matrices)				
🔗 Level 3 Application: Sugar-Free Soft Drinks & Flavored Waters (5 materials)				
ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#85	Sweetex 2E Family: Sweetex 2E	High-intensity clean sweetness profile with zero calories and synergistic sweetening power.	Direct TDS	Validated
#86	Sweetex 2F Family: Sweetex 2F	High-intensity clean sweetness profile with zero calories and synergistic sweetening power.	Direct TDS	Validated
#87	Sweetex 2P Family: Sweetex 2P	High-intensity clean sweetness profile with zero calories and synergistic sweetening power.	Direct TDS	Validated
#88	Sweetex S Family: Sweetex S	High-intensity clean sweetness profile with zero calories and synergistic sweetening power.	Direct TDS	Validated
#89	Sweetex SS Family: Sweetex SS	High-intensity clean sweetness profile with zero calories and synergistic sweetening power.	Direct TDS	Validated
📁 Level 2 Product Category: Carbonated Drinks (1 Application Matrices)				
🔗 Level 3 Application: Cola / Carbonated Soft Drinks (17 materials)				
ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#196	Calcium Chloride-25kg Family: Calcium Chloride-25kg	Provides crisp tart acidity, enhances fruit flavor perception, and regulates formulation pH.	Pending CoA	Proposed
#203	Caramel (E150D) Family: Caramel Color	Imparts deep amber to dark brown coloration with excellent acid stability.	Pending CoA	Proposed
#204	Caramel liquid Type E150A 30KG Family: Caramel Color	Imparts deep amber to dark brown coloration with excellent acid stability.	Pending CoA	Proposed
#205	Caramel Liquid Type E150D Family: Caramel Color	Imparts deep amber to dark brown coloration with excellent acid stability.	Pending CoA	Proposed
#206	Caramel Liquid Type E150D 30KG Family: Caramel Color	Imparts deep amber to dark brown coloration with excellent acid stability.	Pending CoA	Proposed
#207	Caramel Powder (E150D) Family: Caramel Color	Imparts deep amber to dark brown coloration with excellent acid stability.	Pending CoA	Proposed
#208	Caramel powder Type E150A 20KG Family: Caramel Color	Imparts deep amber to dark brown coloration with excellent acid stability.	Pending CoA	Proposed
#209	Caramel powder Type E150c 20KG Family: Caramel Color	Imparts deep amber to dark brown coloration with excellent acid stability.	Pending CoA	Proposed

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#210	Caramel powder Type E150d 20KG Family: Caramel Color	Imparts deep amber to dark brown coloration with excellent acid stability.	Pending CoA	Proposed
#221	Citric Acid Anhydrous-25kg Family: Citric Acid	Provides crisp tart acidity, enhances fruit flavor perception, and regulates formulation pH.	Pending CoA	Proposed
#253	L-Tartaric Acid China-25kg Family: L-Tartaric Acid China-25kg	Provides crisp tart acidity, enhances fruit flavor perception, and regulates formulation pH.	Pending CoA	Proposed
#343	Potassium Citrate-25kg Family: Potassium Citrate-25kg	Provides crisp tart acidity, enhances fruit flavor perception, and regulates formulation pH.	Pending CoA	Proposed
#344	Potassium Sorbate Granular-25kg Family: Potassium Sorbate	Broad-spectrum antimicrobial inhibition against yeasts and molds in acidic beverages.	Pending CoA	Proposed
#345	Potassium Sorbate Powder-25kg Family: Potassium Sorbate	Broad-spectrum antimicrobial inhibition against yeasts and molds in acidic beverages.	Pending CoA	Proposed
#349	Sodium Benzoate China-25kg Family: Sodium Benzoate	Broad-spectrum antimicrobial inhibition against yeasts and molds in acidic beverages.	Pending CoA	Proposed
#350	Sodium Benzoate Wuhan-25kg Family: Sodium Benzoate	Broad-spectrum antimicrobial inhibition against yeasts and molds in acidic beverages.	Pending CoA	Proposed
#351	Sodium Citrate-25kg Family: Sodium Citrate-25kg	Provides crisp tart acidity, enhances fruit flavor perception, and regulates formulation pH.	Pending CoA	Proposed

 Level 2 Product Category: Juices & Nectars (1 Application Matrices)

 Level 3 Application: Fruit Juices / Pulp Suspensions (9 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#217	Chlorophyll Family: Chlorophyll Natural Color	Lime, mint, and green tea beverage coloration.	Pending CoA	Proposed
#218	Chlorophyll OS Family: Chlorophyll Natural Color	Lime, mint, and green tea beverage coloration.	Pending CoA	Proposed
#219	Chlorophyll WS 14 % Family: Chlorophyll Natural Color	Lime, mint, and green tea beverage coloration.	Pending CoA	Proposed
#220	Chlorophyll WS 20 % Family: Chlorophyll Natural Color	Lime, mint, and green tea beverage coloration.	Pending CoA	Proposed
#371	Xanthan Gum (200 Mesh) Family: Xanthan Gum	Suspends insoluble fruit pulp and cloud particles uniformly.	Pending CoA	Proposed
#372	Xanthan Gum (80 Mesh) Family: Xanthan Gum	Suspends insoluble fruit pulp and cloud particles uniformly.	Pending CoA	Proposed
#373	Xanthan Gum Clear Family: Xanthan Gum	Suspends insoluble fruit pulp and cloud particles uniformly.	Pending CoA	Proposed
#374	Xanthan Gum F80 Family: Xanthan Gum	Suspends insoluble fruit pulp and cloud particles uniformly.	Pending CoA	Proposed
#375	Xanthan Gum Transparent Family: Xanthan Gum	Suspends insoluble fruit pulp and cloud particles uniformly.	Pending CoA	Proposed

 Level 2 Product Category: Juices & Dairy Drinks (1 Application Matrices)

 Level 3 Application: Chocolate Milk / RTD Drinks (9 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#223	Cocoa Butter Substitute-local-25kg Family: Cocoa Powders & Fats	Suspension stability and rich chocolate taste notes.	Pending CoA	Proposed
#224	Cocoa Powder G100-25kg Family: Cocoa Powders & Fats	Suspension stability and rich chocolate taste notes.	Pending CoA	Proposed

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#225	Cocoa Powder JB800-25kg Family: Cocoa Powders & Fats	Suspension stability and rich chocolate taste notes.	Pending CoA	Proposed
#226	Cocoa Powder S9-25kg Family: Cocoa Powders & Fats	Suspension stability and rich chocolate taste notes.	Pending CoA	Proposed
#227	Cocoa Powder SL60-25kg Family: Cocoa Powders & Fats	Suspension stability and rich chocolate taste notes.	Pending CoA	Proposed
#228	Cocoa Powder SP70-25kg Family: Cocoa Powders & Fats	Suspension stability and rich chocolate taste notes.	Pending CoA	Proposed
#229	Cocoa Powder V98-25kg Family: Cocoa Powders & Fats	Suspension stability and rich chocolate taste notes.	Pending CoA	Proposed
#246	HAZELNUT PASTE Family: HAZELNUT PASTE	Suspension stability and rich chocolate taste notes.	Pending CoA	Proposed
#247	HAZELNUT PASTE TYPE C Family: HAZELNUT PASTE TYPE C	Suspension stability and rich chocolate taste notes.	Pending CoA	Proposed

 Level 2 Product Category: Instant Drinks & Clouding (1 Application Matrices)

 Level 3 Application: Instant RTD Mixes & Cloudy Beverages (5 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#234	Dextrose Anhydrous-25kg Family: Dextrose	Provides cloud opacity, mouthfeel creaminess, body, and carrier functionality.	Pending CoA	Proposed
#248	Lactose-Imported-25kg Family: Lactose-Imported-25kg	Provides cloud opacity, mouthfeel creaminess, body, and carrier functionality.	Pending CoA	Proposed
#250	Lemon cloud Family: Lemon cloud	Provides cloud opacity, mouthfeel creaminess, body, and carrier functionality.	Pending CoA	Proposed
#256	Maltodextrine-Local-25kg Family: Maltodextrine-Local-25kg	Provides cloud opacity, mouthfeel creaminess, body, and carrier functionality.	Pending CoA	Proposed
#260	Non Dairy Creamer Family: Non Dairy Creamer	Provides cloud opacity, mouthfeel creaminess, body, and carrier functionality.	Pending CoA	Proposed

CHAPTER 7

CONFECTIONERY SECTOR

22 Master Products

22 Application Routes

Itemized finished-product matrix distribution, functional ingredient behavior, and physical TDS laboratory audit status:

📁 Level 2 Product Category: Sugar Confectionery (1 Application Matrices)

🔗 Level 3 Application: Hard / Soft Candies (11 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#217	Chlorophyll Family: Chlorophyll Natural Color	Vibrant olive-to-bright green natural coloration (E140/E141).	Pending CoA	Proposed
#218	Chlorophyll OS Family: Chlorophyll Natural Color	Vibrant olive-to-bright green natural coloration (E140/E141).	Pending CoA	Proposed
#219	Chlorophyll WS 14 % Family: Chlorophyll Natural Color	Vibrant olive-to-bright green natural coloration (E140/E141).	Pending CoA	Proposed
#220	Chlorophyll WS 20 % Family: Chlorophyll Natural Color	Vibrant olive-to-bright green natural coloration (E140/E141).	Pending CoA	Proposed
#230	Curcumin WS 10 % Family: Curcumin Natural Color	Brilliant lemon-yellow natural shade with clean sensory profile.	Pending CoA	Proposed
#231	Curcumin WS 15 % Family: Curcumin Natural Color	Brilliant lemon-yellow natural shade with clean sensory profile.	Pending CoA	Proposed
#232	Curcumin WS 5 % Family: Curcumin Natural Color	Brilliant lemon-yellow natural shade with clean sensory profile.	Pending CoA	Proposed
#254	Lutein WS 10% Family: Lutein Natural Color	Brilliant lemon-yellow natural shade with clean sensory profile.	Pending CoA	Proposed
#255	Lutein WS 5% Family: Lutein Natural Color	Brilliant lemon-yellow natural shade with clean sensory profile.	Pending CoA	Proposed
#362	Sunset Yellow Family: Sunset Yellow	Brilliant lemon-yellow natural shade with clean sensory profile.	Pending CoA	Proposed
#376	Yellow color W Family: Yellow color W	Brilliant lemon-yellow natural shade with clean sensory profile.	Pending CoA	Proposed

📁 Level 2 Product Category: Chocolate (1 Application Matrices)

🔗 Level 3 Application: Compound Chocolate, Pralines & Fillings (9 materials)

ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#223	Cocoa Butter Substitute-local-25kg Family: Cocoa Powders & Fats	Imparts rich authentic cocoa/nut flavor, deep coloration, and smooth fat crystallization profile.	Pending CoA	Proposed
#224	Cocoa Powder G100-25kg Family: Cocoa Powders & Fats	Imparts rich authentic cocoa/nut flavor, deep coloration, and smooth fat crystallization profile.	Pending CoA	Proposed
#225	Cocoa Powder JB800-25kg Family: Cocoa Powders & Fats	Imparts rich authentic cocoa/nut flavor, deep coloration, and smooth fat crystallization profile.	Pending CoA	Proposed
#226	Cocoa Powder S9-25kg Family: Cocoa Powders & Fats	Imparts rich authentic cocoa/nut flavor, deep coloration, and smooth fat crystallization profile.	Pending CoA	Proposed
#227	Cocoa Powder SL60-25kg Family: Cocoa Powders & Fats	Imparts rich authentic cocoa/nut flavor, deep coloration, and smooth fat crystallization profile.	Pending CoA	Proposed
#228	Cocoa Powder SP70-25kg Family: Cocoa Powders & Fats	Imparts rich authentic cocoa/nut flavor, deep coloration, and smooth fat crystallization profile.	Pending CoA	Proposed
#229	Cocoa Powder V98-25kg Family: Cocoa Powders & Fats	Imparts rich authentic cocoa/nut flavor, deep coloration, and smooth fat crystallization profile.	Pending CoA	Proposed
#246	HAZELNUT PASTE Family: HAZELNUT PASTE	Imparts rich authentic cocoa/nut flavor, deep coloration, and smooth fat crystallization profile.	Pending CoA	Proposed
#247	HAZELNUT PASTE TYPE C Family: HAZELNUT PASTE TYPE C	Imparts rich authentic cocoa/nut flavor, deep coloration, and smooth fat crystallization profile.	Pending CoA	Proposed

Level 2 Product Category: Gel Confectionery (1 Application Matrices)				
Level 3 Application: Gummies / Jellies (2 materials)				
ID	Material Name & Family	Functional Usage in Food Matrix	TDS Status	Validation
#303	Pectin CE 514 Family: Pectin Functional Systems	Produces clear elastic gummy jellies with fast setting time and high heat stability.	Pending CoA	Proposed
#310	Pectin Ultra Family: Pectin Functional Systems	Produces clear elastic gummy jellies with fast setting time and high heat stability.	Pending CoA	Proposed
