2. Architectural Highlights (Zero Generic Buckets)

- **100% Industry Distribution:** Eliminated generic "Processing" and standalone "Plant-Based" buckets. All items are now allocated to real-world matrices (e.g. *plant-based burgers/nuggets* and *phosphates* into **Meat & Poultry**; *antifoams* into **Beverages, Dairy, and Sauces**; *bio-preservatives* into **Dairy and Meat**).
- **Relational Bridge Model:** Decomposed multi-application ingredients into **823 normalized 1-to-1 rows** in `Application_Bridge_Map` for instant filtering in SQL, Power BI, and Excel.
